Green gram program farming clusters. **Page 4**

Trees make the environment better for us all. **Page 5**

Fast growing indigenous trees. **Page 6**

Your Accountability Person and Co-Leader will now serve you in Group of Cluster Council.

In TIST, we learn and develop best practices by trying new things and observing and learning from the results. After a year of experience with elected Group of Clusters Councils Representatives, many TIST farmers have come up with ideas to improve this service structure. The TIST Leadership Council has agreed to this idea: beginning this month, the Cluster Accountability Person and the Co-leader will serve as the Cluster's representatives to the Group of Clusters Council. This change will simplify elections and give the elected cluster leaders more ways to grow and serve in TIST.

A Group of Clusters is 2 to 4 clusters close enough to be able to share equipment and training capabilities.

Like in the previous Councils, the new GOCC will serve for 6 months. Please note, Co-leader will serve as GOCC representative for the period he or she is serving as Co-Leader (4 months) and two more months while serving as the Cluster Leader. Similarly, the Accountability Person will serve on the Council for 4 months while serving as Accountability Person and 2 more months while serving as Co-Leader. Both leaders will rotate out when they have served 6 months but will continue to serve their clusters for the remaining period in their Cluster leadership roles.

The Group of Council (GOC) will be meeting monthly preferably on the first week of the month and should submit reports of each meeting.

Responsibilities of elected Group of Clusters Representatives.

- 1) Discover and share Best Practices from Clusters;
- 2) Assure high quality training for the Clusters following TIST Values;
- 3) Assure high quality Quantification following TIST Values;
- 4) Maintain working equipment for training and Quantification;
- 5) Report concerns and make recommendations for policies to Regional Council;
- 6) Expand TIST through present Clusters;
- 7) Hold Administrative Hearings if a Quantifier or Trainer is suspended to investigate facts and make recommendations on suspension;
- 8) Hold Administrative Hearings if a Cluster Leader is not following TIST Values;
- 9) Recommend people from the Group of Clusters for additional TIST responsibilities such as Auditor, TSE, or Master Trainer.

TIST and its benefits continue to grow!

By Aaron Kaindio

As TIST expands to new areas within our country, more and more Clusters are being formed, and existing clusters are growing as neighbors join to create new TIST Small Groups. TIST benefits are being shared and experienced in new areas.

Today, more than 130 active clusters have been formed. We are working hard to increase the number of Clusters to 200 by the end of this year.

We thank our TIST Kenya Team for their hard work and dedication to ensure that each and every cluster is well organized, well served, and moving ahead to meet the TIST goals.

As we all know, we all need to work together to help TIST and its benefits grow. We

can plant trees, and develop and use other TIST Best Practices like Conservation Farming (CF), improving riverbanks, and planting and caring for diverse trees to make our clusters strong as we improve our own farms and lives.

As a reminder:

- A Cluster should have 30-50 Small Groups
- A Cluster's Small Groups should be within walking distance of a central meeting point
- A Cluster should have at least 100 hectares of land set aside for tree planting
- A Cluster should have at least 200,000 live trees
- A Cluster should do accurate quantification and high quality training

- A Cluster should have enough seedlings in nurseries for annual planting needs. Each Small Group should plant at least 1,000 trees per year to have 5,000 trees by the fifth year

What Should a Good Cluster Do?

- A Cluster should hold elections each 4 months to select an Accountability Person who will rotate through the positions
- A Cluster should meet every month for training, sharing of best practices, distribution of Mazingira Bora, payments, and other matters
- At Cluster meetings, representatives should share information transparently with other members, such as how the cluster budget was used
- At the monthly Cluster meeting, a Cluster should submit their Cluster Meeting Record and their Cluster Accounting Form by Palm
- A Cluster should actively request quantifications when needed
- A Cluster should ensure that quantification is accurate
- A Cluster should work to improve data quality

of its Small Groups so that more trees can be eligible for the carbon market (included in Carbon Project Documents)

- A Cluster should work to make payments to each Small Group
- A Good cluster is always recruiting and training new Small Groups. GROWTH makes the TIST program stronger! A Cluster should multiply to 2 when it reaches 400 members

What Should You Do If You Need Assistance?

- For information on quantification data quality, contact Martin Weru 0722846501
- For information on equipment (Palms), contact Charles Ibeere 0720474209
- For information on expanding your Cluster, contact Eunice Wambui 0724431071

At today's meeting, talk with your Cluster Service Team and Cluster Representatives. How many trees does your cluster have today? How many Small Groups does your cluster have today? What can YOU do today to make your cluster strong? In TIST, we can!

Creating a bright future for our children: diverse trees help!

By Aaron Kaindio

When you plant a tree, know that you are helping even the future generation so they will have a good, clean and beautiful environment. They shall appreciate that we worked so hard to fight climate change and to eradicate poverty. This is why we in TIST are more selective on what species of trees to plant in on our lands and along our riverbanks. We are planting not just for ourselves, but also for our children, and theirs.

Some trees can be harmful to our environment in some areas, though they have other benefits. Trees like eucalyptus grow very quickly because they consume a lot of water and soil nutrients. For this reason, this tree can be good for commercial purpose, but may harm the environment in some areas, especially along rivers and in wetlands. They do not grow well in fields where we want to grow other crops and may make the soil less suitable for crops even after tree harvest.

We are planting trees, which shall last for the

long –term (30 years and over) as required by carbon markets. Farmers in Small Groups with high percentage of eucalyptus should try to achieve the TIST recommendation of having no more than 33% eucalyptus trees, by planting indigenous trees on new land or thinning some eucalyptus and replacing them with other trees, especially indigenous trees. This is especially important along rivers. Remember that the government discourages planting of eucalyptus near rivers and in riparian areas. Plant water friendly indigenous trees, and follow best practices, and you may be able to qualify for the additional incentive for indigenous trees in riparian areas. You'll be making rivers healthier for your family, for people downstream, and for generations to come.

Let's all do this so that we can sustain our TIST program and also our entire environment.

**The writer is TIST Quantifier, Kigucwa
Cluster. aronkandio@tist.org.**

Green gram program farming clusters.

By Jennifer Kithure

TIST Clusters have begun yet another Best Practice: growing green grams for more income and nutritional purposes for our families. We have started with twelve pioneer clusters, which, through the **Helped to Help program**, will expand to other Clusters in coming seasons.

These pilot clusters are Mumbuni, Kiengu, Kaanwa, Mworoga, Giaki, Matakiri, Kirindini, Nkondi, Tunyai, Gachuua, Kawiru MCK and Mikinduri.

In each of the 12 Clusters above, 5 members each received 5kgs of green gram of N26 variety to plant on one acre. Due to smaller land size in some areas, in some clusters, farmers shared the seed to combine effort, with each to plant on his or her land half an acre of green gram. Harvest will be in January, and each promised to share from their harvest so that 2 more farmers in their cluster can plant next season. To this end, in February, pioneers will pass 5kgs of N26 green gram to three others in their cluster.

Thousands of TIST farmers want to grow green gram, both for its good nutrition and its commercial potential, since it grows well even with low rainfall. Pioneers were trained on marketing of Green Gram at a seminar. You can organize in your clusters to try growing green gram. Here are some things to keep in mind for success in the green gram market:

Commercialization eye.

Commercialization is a commercial approach to enterprise development that looks at a business processes from a benefit maximization perspective. For success, an entrepreneur needs to identify all the activities involved in the running of his /her enterprise with a business mind. It involves analyzing every stage to identify the cost and benefits. Producer/processing groups need to view their farming activities with a commercial eye. In addition to producing for subsistence needs, the members should gear themselves to producing for income generation. The incomes generated should however be sufficient to meet for the costs incurred in production and to create optimal profits for the members.

Community commercialization involves:

- I. Ensuring that the enterprise emphasizes a business/market oriented approach at all levels to facilitate a less cost –more value attitude

among the producers, fostering optimal profits.

2. Producers conducting a simple market research to identify their strengths and the underlying market opportunities.
3. Producers forming business units with clear membership guidelines and allocations of duties and responsibilities.
4. Different TIST producer groups coming together to form large units otherwise known as commercial villages to bulk enough produce for institutional, formal and mass markets
5. Establishing the producer group governance structures.

TIST Cluster commercialization.

Definition – Cluster commercialization is a market led commercial approach through which typical TIST cluster are commercialized and equipped to meet private sector markets requirements and further increase the commercial village participation along value chains. Villages are empowered to operate like business units to achieve significant volumes of farm produce supply consistently, improve their supply and outsourcing logistics and achieve efficiency.

This aims at:

- a. Mobilizing farmers in the social villages to form commercial producers groups (CPG).
- b. Integration of small groups farmers and villages into mainstream value chains.
- c. Enhance the capacity of clusters as respectable market players.
- d. Increase the competitiveness of small holders.

Benefits of Cluster commercialization.

The major benefit or advantages that are derived from such an approach include:

- a. Collection, transportation, processing and marketing of produce together effectively and efficiently.
- b. Support to agricultural production of members through distribution of farm inputs
- c. Dissemination of applied technology to members.
- d. Provision of credit to members for defraying urgent expenses such as school fees, funerals, hospital bills etc. at affordable cost.
- e. Creating employment indirectly, through self-employment in the industry.
- f. Collective marketing increases product

- volumes thus increasing chances of attracting more buyers.
- g. A contract farming or contract production for groups.
 - h. Proper saving schemes enable members to reduce mismanagement of funds both for group and for members.
 - i. Group planning on viable business opportunities
 - j. Organized groups attract donors to support group projects.

TIST Clusters green gram champions are in all the 12 clusters that have started the green gram farming program. They will support with green gram production, seed bulking and marketing. This will happen with advice and support of Farm Concern International, who trained the champions on the matters described in this article.

Core factors and responsibilities of green gram champions.

- I. To review periodically the situation of green gram production and examine problems of common interest in this field;

- II. To prepare coordinated production program schedules to be executed by the commercial producer groups.
- III. To ensure the coordination of effort and the cooperation of production units.
- IV. To discuss technical subjects in relation to green gram production and marketing with other stake holders.
- V. Work out a production and marketing plan in consultation with the local producers
- VI. To promote the sharing of responsibility for resource management and planning between the different spheres of Government, the farmers and other stake holders.
- VII. To provide guidelines on sustainable development of natural and physical resources for the farmers.

Learn more about green gram today! If your cluster is in a region favorable for cultivating green gram, and you are interested in joining to eradicate hunger in our community and country at large – just contact Jeniffer Kithure phone no. 0726319539 for more information. With TIST we grow, eradicate hunger and sell carbon credits.

Trees make the environment better for us all.

In TIST, we plant trees to take part in the carbon market and earn income from carbon offset sales. However, the other benefits of trees are enormous! Here are just a few benefits we (and the rest of the world) enjoy:

- Trees serve as natural habitat to support a wide variety of flora and fauna. They provide a sense of privacy and security to wildlife seeking shelter in the woods and provide them with food. Protecting biodiversity makes our farms and our planet more productive and resilient to climate change and other challenges.
- Trees improve the quality of air and reduce dangerous pollution. Trees remove excess carbon dioxide and air pollutants including sulfur dioxide, ozone and nitrogen oxide. In return, they give us oxygen required for life.
- The visual quality of a landscape is improved by planting trees, which, in turn, improves the quality of life. The greenery of trees adds color to the landscape and enhances the picturesque beauty of the environment.

- Trees control the climate by moderating the effects of sun, wind, and rain. They can help prevent severe floods, landslides, and wind damage. Trees moderate flood hazards by allowing the rainwater to percolate into the soil instead of running over it.
- Trees reduce soil erosion. Their roots bind soil that would otherwise wash away in rainstorms and floods. Trees also help improve the fertility of soil. Rich soil transfers nutrients to food, which contributes to human health.
- Trees are great absorbers of noise. Noise pollution can be reduced to a great extent by planting more and more trees.

The demand for clean drinking water can be met by planting indigenous trees. Forests and plant cover naturally slows the runoff of rainwater and filters it into the soil. Once slowed, rainwater seeps down to refill underground aquifers we depend on for our use. Trees also shade rivers, keeping water cool, and slowing its loss through evaporation.

Fast growing indigenous trees.

By Christine Yankel

Indigenous trees provide many different benefits. This month, we focus on some indigenous trees that are especially useful because they are fast growing. In the wild, often these species are pioneer species, growing first and fast when space is opened by fire or cutting. Talk to trainers and other Small Groups in your cluster and discuss together which species are best in your area.

Hagenia abyssinica, African redwood, muhooru

With its beautiful red timber, and growing quickly up to 20 m, *Hagenia abyssinica* is a good tree to grow in high elevations that receive 1,000 to 1,500 mm of rainfall each year. It has many benefits: its leaves enrich soil, and make it a good tree for planting in farm fields for agroforestry. It is a medicinal tree, and can help preserve the soil. Its wood is valuable timber and also makes good firewood or charcoal.

The tree grows easily from seed. Pretreatment is not necessary and seeds germinate within 10-20 days of planting with a germination rate of 40-60%.

If planted in together with crops, plant at a low density. Prune branches to encourage straight growth of the trunk.

Macaranga kilimandscharica, mukuhakuha/mukura

Macaranga is a fast-growing tree that is a good choice for growing together with coffee or bananas.. It grows best with 1,500 to 2,500 mm of rainfall each year. It is a good barrier tree, and because of its fast growth, can protect soils from eroding. Its wood is good for firewood and is used in making boxes or fencing. An extract of its roots is useful medicine.

Grow macaranga from seed. The tree grows well and with minimal care once well established

Itikuraga bwega bienine naria tukwenda kuanda imera bingi na noitume muthetu jukathuka kiri imera kinya nyuma ya miti yagitwa.

Nitukuanda miti iria igakara igita ririraja (miaka

mirongoithatu na nkuruki) ja uria tukuurua ni thoko cia kaboni. Arimi ndene ya ikundi bibinini baria barina gicunci gikinene kia mibao nibabati kugeria gukinyira uria TIST iuritie ati bethire barina gicunci kia mibao gitigukinya mibao mirongo ithatu na ithatu kiri o miti igana, na njira ya kuanda miti ya gintwire ndenyea miunda imieru kana kuniyiya mibao na kuanda antu ayo mithemba ingi, mono ya gintwire. Babu burina bata mono nterene cia nduuji na akui na nduuji iji. Aanda miti ya gintwire iri ikaranagira ba ruuji bwega na uthingatire mitire imiega nkuruki na womba kuewa mbeca cia kwongera niuntu bwa miti ya gintwire ndene ya miunda iria iri akui na nduuji. Ugatuma nduuji cigie thiria nkuruki niuntu bwa nya yaku, antu baria bari bwagaiti nab aria bakeeja.

Tuthithieni babu twinthe nikenda tuumba gwika muradi jwetu jwa TIST na kinya naria gututhiurukite. **Muandiki ni Mutari miti wa TIST, Kigucwa Cluster. aronkaindio@tist.org.**

Murandi jwa kuanda ndengu ndene ya Cluster.

Ni Jennifer Kithure ukuuga

TIST niambiritie mwitire jungi jumwega nkuruki: kuanda ndengu niuntu bwa mbeca na na kinya niuntu bwa kuriwa ni njia cietu. Nitwambiritie na cluster ikumi na ijiri, juria, gukurukira mubango jwa Tethua Utethie jugeta kiri cluster ingi ndene ya mbura iria ikeeja.

Cluster iji ciambiritie ni Mumbuni, Kiengu, Kaanwa, Mworoga, Giaki, Matakiri, Kirindini, Nkondi, Tunyai, Gachuua, Kawiru MCK na Mikinduri.

Ndene ya o cluster kiri iji, amemba batano nibaewi o muntu kilo ithano cia ndengu cia muthemba jwa N26 kuanda ndene ya acre imwe. Niuntu bwa thina ya miunda iminini ndene ya ntuura imwe, arimi nibagaanire mbeu, na o muntu aanda acre nusu ya ndengu. Maketha ni mweri jwa January na o muntu nekire wirane kugaana kuumania na iketha riawe nikena arimi bangi bairi ndene ya cluster yao bomba kuanda mbura iu ingi. Ndene ya mweri jwa iiri, baria bambiririe muradi juju bakanenkanira kio ithano cia N26 kiri bangi bathatu ndene ya cluster yao.

Ngiri cia arimi ba TIST niikiwenda kuanda ndengu, niuntu bwa kuria bwega na kinya mbeca, niuntu niikuraga bwega na ngai inkai. Baria bambiririe nibaritanirwe kwendia ndengu ndene ya semina. No bumbanganie ndene ya cluster yenu kugeria kuanda ndengu. Aja ni mantu jamwe jaria ubati gwika mutwe nikenda uumbana ndene ya thoko ya ndengu:

Riitho ria kuthithia biashara.

Commercialization ni njira ya kibiashara ya gukura kingugi iria itegaga biashara na riitho ria kuneneyia baita uria kuumbika. Nikenda ombana, mubiashara netagia kumenya mantu jonthe jaria joonekaga kiri biashara iu na mathuganio ja kibiashara. Ni amwe na gutegeera o itagaria nikenda umenya mbeca iria igatumika na baita. Ikundi bia kuthithia nibigwitia gutegeera urimi bwao na ritho ria kibiashara. Amwe na kurima irio, amemba nibabati gwisukuma kiri gucua mbeca. Mbeca iria ikaumania na bubu nibati kung'ana kuria mbeca iria ciatumiri kiri kurima na kua amemba baita.

Gukura kibiashara gwa ntuura niamwe na:

- I. Kumenyeera ati biashara nigutumira mono njira ya kibiashara mantune jonthe nikenda ithuganio ria utumiri bwa mbeca inkai - na mantu jamanene gukinyirwa kiri baria bakurima, nikenda baita cinenea.

2. Arimi gucua umenyo bwiegie thoko nikenda boona inya ciacio na twanya turia turi thokone.
3. Arimi bakuthithia biashara cirina mantu jaria amemba babati kuthingatira, na ngugi cia o umwe.
4. Ikundi bia arimi mwanya ndene ya TIST biria bikugwatana kuthithia biashara inene iria ciitagwa ntuura cia kibiashara kuuthurania into bing'ani bia thoko inene.
5. Gwitikaniria njira ya utongeria ya gikundi

Gutegeera mantu ja Cluster TIST na njira ya kibiashara.

Guku ni kuuga –lji ni njira ya kibiashara iria cluster ya TIST yumba gukura kibiashara na kuumba gukinyira mantu jaria thoko cia antu ciitagia na kuingia antu baria bari biasharene ndene ya ntuura kuringana na uthongi bwa into biria bakurima. Ntuura niciikagirwa inya gwita ngugi ta biashara gukinyira ukethi bwa into bibingi bia munda rionthe, kwingiyia biria bakurima, kugura biria bakwenda na gukinyira

Nibutegagira :

- a. Kwariria arimi ndene ya ntuura cia ikaro kwegie kuthithia ikundi (CPG- commercial producers groups)
- b. Integration of small groups farmers and villages into mainstream value chains. Kugwatana kwa arimi na ntuura ndene ya ikundi bibinini
- c. Enhance the capacity of clusters as respectable market players.
- d. Increase the competitiveness of small holders.

Baita cia gutegeera mantu na ritho ria kibiashara ndene ya Cluster.

Iria nene buru iria ciumba kuumania na njira iu ni:

- a. Kuuthurania, gukamata, kuthithia na kwendia gwa gintu amwe bwega na ntuti.
- b. Utethio kiri urimi kiri amemba gukurukira kuewa into bia gutumira muundene
- c. Gukinyirua umenyo bwa njira injeru cia gutumira kiri amemba.
- d. Kuewa marandu kwa amemba nikenda batumira kiri mantu jaria jakwijira ta mbeca cia cukuru, cia mathiko, ciaa cibitari bakiriagua baita iria bakomba kuria
- e. Kuthithia ngugi gukurukira guciandika ndene ya biashara iji.
- f. Kwendia amwe nikuingiagia into na kwou

- gukomba gukucia aguri babaingi.
- g. Urimi bwa kuthithia into biititue ni ikundi.
- h. Mibango imiega ya gwika mbeca nitethagia kuniyia winyangia bwa mbeca ni gikundi na ni mumemba.
- i. Kubanga ta gikundi niku kwega kiri kujukia twanya twa kibashara.
- j. Ikundi bibanganitie nibikucagia airitiri ba kuejana mbeca gutetheria miradi ya gikundi.

Antu baria baritenwe kwegie ndengu ndene ya cluster cia TIST bari ndene ya cluster cionthe ikumi na ijiri iria ciambiritie muradi jwa uandi ndengu. Bagatetheria kiri urimi bwa ndengu, kuuthurania mbeu na kwendia. Bubu bugakarika kumania na umenyo na utethio kuma kiri Farm Concern International baria baritanire antu baba kwegie mantu jaja jaandiki.

Ngugi iria nene cia antu baba baritanirwe kwegie urimi bwa ndengu.

- I. Gutegeera o nyuma ya igitaria urimi bwa ndengu bukinyite na gutegeera thina iria cikwoneka mono urimine bubu;

- II. Kubangania uria urimi buria bukuthithua ni ikundi biria bikendia ndengu uria bugwita.
- III. Kumenyeera uriti ngugi na kugwatanira kwa baria bakurima ndengu.
- IV. Kwariria mantu jegie urimi na kwendia kwa ndengu amwe na bangi baria bakoona baita kumania naku.
- V. Kuthithia mubango jwa kurima na kwendia ndengu amwe na arimi bangi.
- VI. Gwikira inya kugaana kwa ngugi ya kumenyeera na kubangira into gatigati ka thirkari, arimi nabaria bangi bakwona baita kumania na urimi bubu.
- VII. Kuejana rwatho rwegie gwitithua nambele ni arimi kwa into biria birio buria bukombika ndene ya igita riraaja.

Menya jangi kwegie ndengu narua! Kethira cluster yaku iri antu aria urimi bwa ndengu bukabua na urina bata ya gutonya nikenda uthiria mpara ndene ya ntuura yaku na nthiguru yetu- aria na Jeniffer Kithure namba ya thimu 0726319539 nikenda wirwa jangi. Amwe na TIST nitukuraga, tukathiria mpara na tukendia kaboni.

Miti niitumaga naria gututhiurukite gukathongoma nkuruki kiri twinthe.

Ndene ya TIST, nituandaga miti nikenda tuumba gutonya thokone ya kaboni na twona mbeca kumania na kwendia ruugo ruruthuku. Indi-ri, baita ingi cia miti niinene!

Aja ni baita imwe inkai iria batwi (na nthiguru yonthe) tugwiragirua:

- Miti ni gikaro kiria gikaragwa ni mithembia imingi ya imera na nyomoo. Niithaga na gukaria nyomoo cia kithaka iria igucua gwa gukara na ikabaa irio. Kumenyeera mithembia imingi ya nyomoo na imera nigutumaga miunda yetu na nthiguru igaciara nkuruki na ikarega kugaruka rera na mantu jangi.
- Miti nithongomagia ruugo na ikanyiyia kuthuuka kuria gutibui. Miti niritaga ruugo ruruthuku rwa kaboni na rungi ruria ruthukagia ruugo ta rwa sulfur, ozone na nitrogen. Gucokia, nituejaga ruugo rurwega rwa oxygen.
- Nthi nithongomaga methone ni kuanda miti, buria buthongomagia miturire. Rangi ya miti niongagira rangi na ikathongomia naria gututhiurukite.

- Miti nithithagia reran a njira ya kuniyia urito bwa riua, ruugo na ngai. No itethie kuthiria kuigara kwa ruuji, kugua kwa nthi na kugitaru kuumenie na ruugo. Miti ninyagia mantu jaria jaumanagia na kuigara kwa ruuji na njira ya gwitikiria ruuji rwa ngai rutonya muthetune antu a gwitira iguru.
- Miti ninyagia gukamatwa kwa muthetu. Miri yayo nigwataga muthetu juria juringi gukamatwa ni ngai indito na inene. Miti nitethagia kuthongomia unoru bwa muthetu. Muthetu jumunoru nijuretaga nutrient kiri irio, untu buria butethagiria thiria ya antu ya mwiri.
- Miti nijukagia gituma. Kuthukia ruugo na gituma no kunyue nainya mono na njira ya kuanda miti ingi na ingi.

Ruuji rurutheru rwa kunyua no ruretwe ni kuanda miti ya gintwire. Miit na imera nibinyagia spidi ya ruuji rwa ngai na bikarutonyithia muthetune. Ruuji rwanyiyia spidi, ruuji rwa ngai nirutonyaga nthiguru na kujuria irinya biria tutumagira. Miti kinya nikunikagira nduuji, na gwika ruuji na mpio kou kuniyia gukamatwa kwaru ni riua.

Miti ya gintwire iria ikurangaga.

Ni Christine Yankel

Miti ya gintwire nithagirwa iri na baita inyingi mwanya. Mweri juju, tugategera miti ya gintwire imwe mono iria itethagia nontu nikurangaga. Nau mwitune, jaria maingi mithemba iji ni mithemba ya kwambia, ikuraga mbele na ikurangaga riria kanya kathithua gukurukira kuithia kana kugiita. Uria aritani na ikundi bingi bibinini ndene ya cluster yaku mithemba iria iri imiega ntuurene yaku

Hagenia abyssinica, African redwood, muhooru

Na mbao ciaju intune inthongi, na jugikurangaga mwanka uraja bwa 20m, muhooru ni muti jumwega jwa kuanda guntu kuria kuri iguru kuria kwithagirwa kuri na ngai inyingi (1000 gwita 1500mm ya ngai o mwaka). Muti juju jurina baita inyingi: mathangu jaju nijanoragia muthetu, na bubu nibujuthithagia muti jumwega jwa kuanda miundene ya imera amwe na imera riria ukwenda kuungania. Ni muti jurina ndawa, na jumba gutethia gukaria

muthetu. Mbao ciaju ni injega mono cia gwaka na kinya niithithagia nkuu injega kana makara

Muti juju nijukuraga jutina thina kuuma kiri mbira. Ti lazima mbegu iji cithuranirwa nontu mbira niciumaga ndene ya ntuku ikumi gwita mirongo iiri na niikurangaga (na rate ya 40 gwita 60%).

Jukaandwa amwe na imera, ukaanda imingi. Gita mathangu nikenda muti jukuura jurungami bwega

Macaranga kilimandscharica, mukuhakuha/ mukura

Mukura ni muti jukurangaga na ni muti jumwega riria ukujuandaniria na kauwa kana marigu. Nijukuraga bwega buru guntu kuri kuri na mbura inyingi ya kuuma 1500 gwita 2500mm omwaka. Ni muti jumwega jwa kunyiyia ruugo na niuntu nijukurangaga, jwomba kumenyeera muthetu kuumania na gukamatwa. Miiri yaju nithithagia ndawa iria itethagia mono.

Anda mukura kuuma kiri mbira. Muti juju nijukuraga bwega na kumenyeerwa gukai riria jwagata.

Development and Community Forestry
Program.

Amemba a Kangeta Cluster. Mweri uria urathirire nimathomithirio guthondeka nursery na kuhaririria mugunda niundu wa kuhand irio. Ngurubu ithathatu nini niciangirire Tist ihinda ria mucemanio (mathomo).

Thiini:

Muigi mathabu na munini wa mutongoria nimiritungataga thiini wa gikundi kia kanju ya cluster. Page 2

TIST na mawega mayo kwongerereka! Page 2

Guthondeka muturire wa mbere mwega kuri ciana ciitu: miti mithembwa miangi niiteithagia! Page 3

Cluster cia urimi wa ndengu. Page 4

Miti niyagirithagia maria maturigiciirie. Page 5

Miti ya ki-nduire iria ikuraga naihenya. Page 6

Muigi mathabu na munini wa mutongoria nimaritungataga thiini wa gikundi kia kanju ya cluster.

Thiini wa TIST, tuthomaga na tugeka maundu meru na kwiruta na maciaro mamo. Thutha wa mwaka 1 turi na kanju ya gikundi kia cluster, arimi aingi nimaheanite mawoni ma uria tungigacirithia mutaratara uyu. Kanju ya utongoria ya TIST niitikirite mawoni maya: kwambiriria mweri uyu, muigi mathabu hamwe na munini wa mutongoria nimaritungataga ta arugamiriri thiini wa kanju ino. Ugaruruku uyu niukuhuthia ithurano na uhe atongoria aria mathuritwo thiini wa cluster njira nyingi na njeru cia gukura na gutungata thiini wa TIST.

Gikundi kia cluster githondekagwo ni cluster 2-4 iria cikuhaniriirie niguo mahote kuhuthira indo imwe cia githomo.

Ota uria kwari thiini wa kanju ya hau kabere, GOCC njeru iritungataga mieri 6. ririkana munini wa mutongoria aritungataga thiini wa GOCC ari ta murugamiriri gwa kahinda karia ari utongoriaini ta munini wa mutongoria(mieri 4) na mieri ingi 2 ari ta mutongoria wa cluster na uu noguo aritungataga. Atongoria aya eeri nimaricenjanagia marikia gutungata mieri 6 na nimarithiaga nambere gutungata gwa kahinda karia gatigaru mari atongoria a cluster.

Gikundi gia kanju (GOC) kiricemanagia o mweri na muno kiumia kia mbere kia mweri na magatuma ripoti ya micemania.

Mawira ma murugamiriri muthure wa gikundi gia cluster;

1. Guthundura na guthomithania mitaratara mieru.
2. Gutigirira githomo ni gia gikiro kia iguru akirumirira mitaratara ya TIST,
3. gutigirira miti niyatarwo wega akirumirira mitaratara ya TIST.
4. Kumenyerera indo cia wira cia githomo na utari wa miti.
5. Kuheana ripoti na gutaara kanju ya matuura
6. Gutheremia TIST kuhitukira cluster.
7. Gutuithania ciira angikorwo mutari wa miti kana muthomithania niarugamitio wira.
8. Gutuithania ciira angikorwomutongoria wa cluster ndararumirira mitaratara ya TIST.
9. Kuheana andu kuri gikundi gia cluster niguo mongererwo mawira ta Auditors, TSE kana muthomithania munene.

TIST na mawega mayo kwongererek!

Mwandiki Aaron Kaindio.

iitu.

Ta kiririkania:

- Cluster yagiriirwo nigukorwo na ikundi 30-50.
- ikundi thiini wa cluster ciagiriyo ni gukorwo hakuhi handu andu mangithii maguru.
- Cluster yagiriirwo gukorwo na mugunda utanyihire 100 hectares wa kuhanda miti.
- Cluster yagiriirwo gukorwo na miti 200,000 iri muoyo.
- Cluster yagiriirwo guitarirwo miti wega na gukorwo na githomo kia iguru.
- Cluster yagiriirwo gukorwo na mimera ya kuigana niundu wa uhandi miti wa o mwaka. O gikundi kiagiriirwo kuhanda miti 1,000 o mwaka niguo gikorwo na miti 5,000 makirikia mwaka wa gatanoo.

Cluster njega yagiriirwo ni gwika atia?

O TIST igithiaga na-mbere na gukura icigo nyingi cia bururi, cluster nyingi makiria nicirathondekwo, na iria cirkuo nicikurite andu angi makiingiraga niguo mathondeke ikundi nini. Mawega ma TIST nimarathii na-mbere na kuoneka na kuiguika.

Umuthi uyu, makiria ma cluster 130 nicithondeketwo. Nituraruta wira na hinya niguo tuongerere namba ya cluster ikinye 200 tugikinyiria muthia wa mwaka uyu.

Nituracokeria timu ya TIST Kenya ni wira wa hinya na kwirutira kunene gutigirira o cluster niibangitwo weega na guthii na-mbere gukinyaniria kiroto gia TIST.

Ota uria tuui, niturabatara kuruta wira na-hinya turi ithuothe niguo tuteithie TIST na mawega mayo ikure. No tuhande miti, tuthondeke na tuhuthire mitaratara miega ta Kilimo Hai, tumenyerere njuui ciitu na tuhande miti ngurani niguo twikire cluster ciitu hinya na twagirithie migunda iitu na miturire

- Cluster yagiriirwo gwika githurano thutha wa mieri 4 niguo guthura muigi mathabu uria ukuambatira ikiroini cia utongoria.
- Cluster yagiriirwo gucemania o mweri guthomithio, na gukurania mitaratara-ini miega, kuamukira ngathiti, kwamukira marihina maundu mangi maingi.
- Thiini wa micemanio ya cluster, arugamiriri magiriirwo ni guthomithania maundu matekuhithirira na aria angi ta uria budget ya cluster yahuthirirwo.
- Mucemanio-ini wa mweri wa cluster, cluster yagiriirwo ni gutuma ripoti cia mucemanio na fomu ya mathabu na palm
- Cluster niyagiriirwo ni kuria itarirwo miti niriya kurabatarikana.
- Cluster niyagiriirwo nigutigirira ati ithabu ria miti nirikinyaniru.
- Cluster niyagiriirwo gutigirira gikiro kia mathabu ni kia iguru kia ikundi nini niguo miti miangi itikirike thiini wa thoko ya carbon.

- Cluster niyagiriirwo ni gutigirira ikundi nini niciamukira marihi
- Cluster njega niiingagiria ikundi njeru na igacithomithia. Gukura nigwikiraga TIST hinya! Cluster niyagiriirwo nikugayanio yakinyia arimi 400.

Ungika atia riria wabatara uteithio?

- Kwa uhoro wa uigiririku wa ithabu ria miti, araniria na Martin Weru 0722846501
- Kwa uhoro wa indo cia wira (palm) araniria na Charles Ibeere 0720474209
- Kwa uhoro wa gutheremia Cluster, araniria na Eunice Wambui 0724431071

Thiini wa mucemanio wa umuthi, araniria na timu ya wira ya cluster na arugamiriri a cluster.

Cluster yanyu iri na miti iigana umuthi? Ni ikundi cigana iri thiini wa Cluster yanyu?
Niatia mungika umuthi niguo gwikira cluster yanyu hinya? Thiini wa TIST, notuhote!

Guthondeka muturire wa mbere mwega kuri ciana ciitu: miti mithemba miangi niiteithagia!

Mwandiki: Aaron Kaindio

Riria wahanda miti, menya ati niurateithia kwagirithia miturire ya ruciaro ruguka niguo magie na maria maturigiciirie mega na matheru. Nimagakenera ati nitwarutire wira na kio niguo kuhurana na ugaruruku wa riera na kuhurana na uthini. Na nikio ithui thiini wa TIST nituthuuraga muno miti iria turahanda migunda-ini iitu na njuui-ini ciitu. Tutirahanda niundu witu no niundu wa ciana ciitu na ciana ciacio.

Miti ingi noikorwo na ugвати kuri maria maturigiciirie mieningi, ona gutuika iri na umithio. Miti ta mibau niikuraga na-ihenya muno tondu niigucagia maai maingi muno na unoru wa tiiri. Niundu wa gitumi giiki, miti ino nimiega na biashara no noithukie maria maturigiciirie, na makirie ruteere-ini rwa ruui na kuria kuri na itomboya. Ndikuraga wega migundai kuria twendaga kuhanda irio na noinine unoru wa tiiri.

Niturahanda miti, iria iguikara kahinda kanene(miaka 30na makiria) ta uria kurendekana

thoko-ini ya carbon. Arimi thiini wa ikundi nini aria mari na gicunji kinene kia miti ya mibau nimagiriirwo gukinyiria watho wa TIST wa gicunji kia 33% kia miti ya mibau, riria twahanda miti ya ki-nduire migunda-ini mieru kan kunyihia miti ya mibau na kuhanda ingi ya kinduire. Njira ino ninjega na makiria ruteere-ini rwa njuui.

Ririkana ati thirikari niihinyagiriria andu matikahande miti ya mibau hakuhi na njuui kuria kwaraga. Handa miti iiganite na maai ya ki-nduire, na urumirire mitaratara ya TIST na nowitikirike kuheo njoherera niundu wa kuhanda miti ya ki-nduire kuria kwaraga. Niugukorwo ukiagirithia njuui niundu wa mucii waku, andu aria marahuthira ruui ruui na ruciaro ruguka.

Reke ithuothe twike uu niguo tuturie TIST na twagirithie maria maturigiciirie.

Mwandiki ni mutari wa miti thiini wa Cluster ya Kigucwa. aronkandio@tist.org

Cluster cia urimi wa ndengu.

Mwandiki: Jeniffer Kithure.

Cluster cia TIST niciambiriirie mutaratara ungi: gukuria ndengu niguo magie na mbeca makiria ohamwe na guthondeka miiri yao na ya micii yao. Nitwambiriirie na ikundo 12 iria kuhitukira mutaratara wa **Help to Help** nicigutheremia kuri Cluster iira ingi

Cluster ici cia kwambiriria ni Mumbuni, Kieng, Kaanwa, Mworoga, Giaki, Matakiri, Kirindini, Nkondi, Tunyai, Gachuua, Kawiru MCK and Mikinduri..

Thiini wa o cluster ici 12, makiria ma amemba 5 nimamukirire ndengu 5kgs cia N26 niguo mahande thiini wa 1acre ya mugunda. Niundu wa unyihu wa migunda mieni imwe, thiini wa cluster imwe, arimi nimagayanaga ndegu niguo makahande o mundu akihanda thiini wa mugunda wa nuthu acre. Magetha nima January, na o murimi nieraniire ati nimakaheana magetha kuri arimi ang 2 thiini wa cluster yao niguo mahande kimera giki kingi. Nginyagia riu, thiini wa February, aria mambiriirie nimakaheana 5kg cia ndengu kuri andi 3 thiini wa cluster.

Makiri ma arimi a TIST nimarenda kuhanda ndengu, niundu wa mawega macio ma kimwiri na wendia wacio thoko-ini, na tondu nicikuraga wega nginya kuria kwaraga. Aria mambiriirie nimaguthomithia aria ang 1 wendia wacio thiini wa seminar. Nomubange thiini wa cluster yanyu uria mukurima ndengu. Maya ni mamwe ma maundu maria wagiriirwo ni kuririkana niguo ugacire thoko-ini ya ndengu.

Ritho ria biashara.

Commercialization ni njira ya kurora biashara na maciaro mayo. Niguo ugie na maciaro, niwagiriirwo ni kumenya maundu maria mabataranagia niguo biashara itihii na-mbere. Wagiriirwo ni guthuthuria a gikiro giothe na urore na riitho ria biashara. Na makiria ma gukuria na kugetha ndengu niundu wa umithio wa ki-mbeca, amemba nimagiriirwo ni

kwihariria niguo magie na maciaro maingi. Maciaro maria makumana na urimi uyu nimagiriirwo gukorwo mari maiganu kuriha mahuthiro maria mahuthiritwo urimi-ini uyu na magie na faida.

Commercialization ya muingi ikoragwo na:

1. gutigirira ati andu nimirora biashara na njira ya guthondeka mbeca niguo magie na mahuthiro manini na umithio munene.
2. Gutigirira niweka uthuthuria wa uria thoko ihana na kumenya uhuthu na uritu wayo.
3. Guthondeka ikundi cia biashara iri na memba etikiriku na mawato ohamwe na kugayana wira.
4. Ikundi cia wonjoria cia wonjoria cia TIST kunyitana niguo ithondeke gikundi kimwe kinene niguo mahote kwonjorithia wega.
5. Kugia na mawatho ma ikundi cia wonjoria.

Commericalization ya Cluster cia TIST.

Commercialization ya cluster ni murorere wa cluster na njira ya wonjoria kuhitukira kuhe cluster indo iria cirabatarania wonjoria-ini niguo gukinyiria ikiro cia wonjoria wa andu kiumbe na. Matuura nimekagirwo hinya niguo makorwo mari ta ikundi cia wonjoria niguo mahote kwonjorithia na kwendia indo ciao.

Gitumi kia maundu maya ni:

- kuhinyiriria arimi mathondeke ikundi cia wonjoria.
- Kunyitithania ikundi na matuura.
- Kuongerera uhoti wa cluster wa kwonjorithia.
- Kwongrera gucindana thiini wa ikundi.

Mawega ma Cluster commercialization.

Umithio uria munene wa maundu maya ni ta maya:

- Kungania, gukuua guthondeka na kwendia indo na njira njega.

- Kunyita mbaru urimi wa amemba na njira ya kuheana indo cia urimi.
- Kuhuthira njira cia technology kuri amemba kuheana ngombo kuri amemba niguo mahote guthomithia ciana , kuriha thibitari na mangi maingi.
- Guthondeka mieke ya mawira na njira ya kwiyandika.
- Kwendia indo muri hamwe niguo indo cikorwi ciri nyingi.
- Gwikanirira kirore muri ta arimi.
- Guthondeka mutaratara wa kuhonokia mbeca.
- Kubanga wega maundu ma biashara.
- Ikundi njega nicigucagiriria donors.

Aria mararuirira urimi wa ndengu thiini wa cluster mari thiini wa cluster 12 iria ciambiriirie kuhanda. Nimakuheana ndengu ohamwe naguteithiriria hari wendia wa ndengu. Maundu maya makuhanika hari na utaari kuma kuri ruhonge ruria rwathomithiria ambiriria na niruo Farm Concern International.

Mawira na uigiririki wa ambiriria.

- I. Kurora weru muikareire wa urimi wa ndengu na na guthuthuria mathina mugundai.
- II. Kuhariria na gutabarira mibango ya wonjoria.
- III. Gutigirira maundu nimaratwarana na-njira iria yagiriire.
- IV. Kwaririria maundu megii ndengu na wonjoria wacio.
- V. Kuhariria na guthondeka mubango wa wonjoria wacio.
- VI. Kwagiririthi wira wa urimi wa ndengu na gucaria honge cia thirkari hamwe na cia andu kiumbe
- VII. guthondeka mawatho na mibango ya kunyitirira uthii wa na-mber wa urimi uyu.

Thoma makiria uhoro wa urimi wa ndengu! Angikorwo cluster yaku iri thiini wa icigo iria ingirimwo ndengu, na niurenda kunyitanira kunina ng'aragu thiini wamatura maitu na bururi wothe – araniria na Jennifer Kathure Phone 0726319539 kwa uhoro makiria. Turi thiini wa TIST nitukuraga, kukeheria ng'aragu na tukendia carbon.

Miti niyagirithagia maria maturigiciirie.

Thiini wa TIST, tuhandaga miti niguo tuhote kwonjorithia thoko-ini ya carbon na tugie na mbeca nikunyihia carbon. Ona kuri o ugwo, mawega mangi ma uhandi wa miti ni maingi na mamagegania! Maya ni mamwe ma mawega maya kuri ithui na thiyothe;

- miti niikoragwo iri ituuro cia nyamu nyingi na mithemba miangi niguo gucihe ugitiri na maundu mangi maingi ohamwe na gucihe irio.
- Miti niyagirithagia riera na kunyihia uthukangia wario. Miti niyehutagia carbon iria iri riera-ini na indo ingi cia guthukia riera ta sulphur dioxide, ozone na nitrogen dioxide. Na igatuhe oxygen iria ibataranagia ni muoyo.
- Miti niithakaragia migunda na micii iitu na kumihe rangi mwega.

- Miti niiteithagiriria hari urumaniriru wa imera na ikaiganania riu, ruhuho na mbura. Niiteithagia kugitira kumana na muiyoro wa maai na mitino ingi.
- Miti niinyihagia tiiri guko ni maai. Miri yayo niihotaga kunyitirira tiiri wega. Miti ningi niikiraga tiiri unoru.
- Miti niinyhagia inegene.

Wendeku wa maai matheru noukinyanire tungihanda miti ya ki-nduire. Mititu na miti ingi niinyihagia uteng'ero wa maai na ikamatheria. Riria maai manyihia ihenya, maai nimaingagira wega tiiri-ini. Miti niihumbagira njuui na ikaiga maai mari matheru na makaga kunyuo ni riu.

Miti ya ki-nduire iria ikuraga naihenya.

Mwandiki Christine Yankel

Miti ya ki-nduire niikoragwo na mawega maingi. Mweri uyu tukurora miti ingi ya kinduire iria ihuthikaga tondu ikuraga na ihenya. Ithaka-ini , mahinda maingi miti ino ikoragwo iri ya kiambiriria na ikuraga naihenya riria yatemwo kana yacinwo ni mwaki. Ariria athomithania na ikundi ingi thiini wa cluster yanyu na mwariririe ni mithemba iriku miega.

Hagenia abyssinica, African redwood, muhooru

Uri na mbau thaka na ndune, na ugikura na ihenya nginya uraihu wa 20m *Hagenia abyssinica* ni muti mwega ungikurio kundu kwamukagira githimi kia mbura kia 1,000-1,500mm o mwaka.niukoragwo namawega maingi, mahuti maguo nimega na tiiri na kwa uguo ugakorwo uri mwega kuhanda kundu kuri na irio. Niukoragwo na dawa na nouhuthike

kumenyerera tiiri. Niukoragwo na mbau njega muno na ngu njega ohamwe na makara.

Muti uyu ukuraga kuma mbegu-ini. Guthondeka mbegu mbere ya uhandite nikwagiriire na imeraga na thiku 10-29 na kumera na gicunji kia 40-60%. Ungihandanirio hamwe na irio cia mugunda ceha mahuti niguo mimera ikure wega.

Macaranga kilimandscharica, mukuhakuha/ mukura

Macakanga ni muti ukuraga na-ihenya hamwe na kahua kana marigu. Ukuraga wega na githimi kia mbura kia 1,0000-1,500mm hari mwaka. Niundu wa gukura na-ihenya, niugitagira tiiri kumana na kiguu. Nimwega na mbau na ngu hamwe na kuiriga na ugakorwo na dawa.

Kuria macakaranga kuma mbegu-ini. Muti uyu ukuraga wega na mubacirire munini.

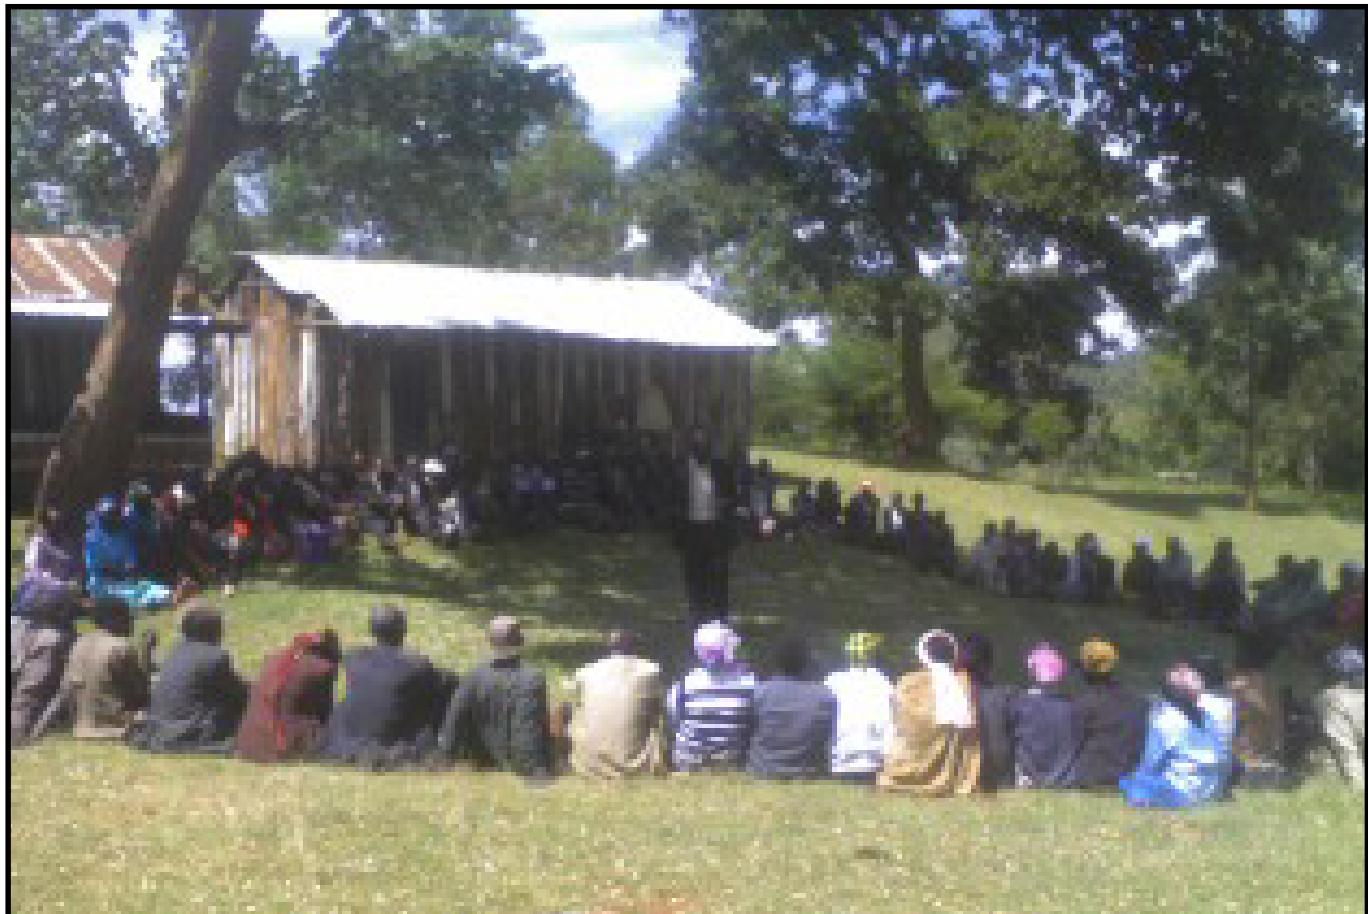

Mazingira Bora

TIST

The International Small Group & Tree Planting Program
www.tist.org

Kiswahili Version

An Environmental, Sustainable
Development and Community Forestry
Program.

Wanachama wa Kangeta Cluster. Mwezi uliopita walikuwa na na mafunzo kuhusu kutengeneza tuta na upandaji wa miti na ukulima. Vikundi sita mpya walijiunga na TIST wakati huo wa mafundisho.

Dani:

Mweka vitabu na pesa zenu na msaidizi wa kiongozi sasa watawatumikia katika chama cha kikundi cha cluster. Ukurasa 2

TIST na faida zake zaendelea kukua! Ukurasa 2

Kujenga kesho iliyo na mwangaza kwa watoto wetu: miti ya aina mbali mbali husaidia!
Ukurasa 3

Mradi wa kulima ndengu katika Cluster. Ukurasa 4

Miti hufanya mazingira kuwa bora kwetu sote. Ukurasa 4

Miti ya kienyenji inayokua haraka. Ukurasa 6

Mweka vitabu na pesa zenu na msaidizi wa kiongozi sasa watawatumikia katika chama cha kikundi cha cluster.

Katika TIST, twasoma na kuanzisha njia bora zaidi za kufanya mambo kuitopia kujaribu mambo mapya na kuangalia na kuyajua matokeo. Baada ya mwaka mmoja wa kuangalia kazi ya waliochaguliwa kama wawakilishi katika chama cha kikundi cha cluster kadhaa, wakulima wengi katika TIST wamekuja na mawazo ya kuboresha muundo huu wa utumishi. Chama cha uongozi katika TIST kimeitikia wazo hili: kuanzia mwezi huu, mwajibikaji wa cluster na msaidizi wa kiongozi watatumika kama wawakilishi wa clusster katika chama cha kikundi cha cluster. Mabadiliko haya yatarahisisha uchaguzi na yawape viongozi wa cluster jia zaidi za kukua na kutumikia TIST.

Kikundi cha cluster ni cha cluster mbili kufika nne zilizo karibu vile zaweza kutumia vifaa na mafunzo pamoja.

Kama katika vyama vilivyopita, GOCC mpya itatumikia miezi sita. tafadhali juu, msaidizi wa kiongozi atatumika kama mwakilishi katika GOCC kwa muda anaotumika kama msaidizi wa kiongozi (miezi minne) na miezi mingine miwili akiwa kiongozi. Similarly, the Accountability Person will serve on the Council for 4 months while serving as Accountability Person and 2 more months while serving as Co-Leader. Vivyo hivyo, mweka vitabu na pesa za cluster atatumika katika chama hiki kwa miezi minne akiwa mweka vitabuna pesa na mingine

miwili akiwa msaidizi wa kiongozi.

Chama cha GOC kitakuwa kikikutana kila mwezi sana sana wiki ya kwanza ya mwezi na kutuma ripoti za kila mukutano.

Kazi za wawakilishi wateuliwa wa kikundi cha cluster

- 1) Kugundua na kugawana mbinu bora kutoka kwa cluster;
- 2) Kuhakikisha mafunzo ya hali ya juu ya cluster yakifuatilia maadili ya TIST;
- 3) Kuhakikisha uhesabu miti wa hali ya juu ukifuatilia maadili ya TIST;
- 4) Kudumisha vifaa vya kazi ya mafunzo na uhesabu miti;
- 5) Kuripoti masuala yanayoleta wasi wasi na kutoa mapendekezo ya sera kwa baraza la mkoa;
- 6) Kupanua TIST kuitopia cluster zilizopo;
- 7) Kufanya mikutano ya kiutawala iwapo mhesabu miti au mwalimu ameachishwa kazi na kuchunguza ukweli na kufanya mapendekezo kuhusu kusimamishwa ;
- 8) Kufanya mikutano ya kiutawala iwapo kiongozi katika cluster hafuatilii maadili ya TIST;
- 9) Kupendelekeza watu kutokana na kikundi cha cluster watakaoongezewa wajibu mwingine katika TIST kwa mfano mkaguzi, TSE au mwalimu bingwa.

TIST na faida zake zaendelea kukua!

Umeletewa na Aaron Kaindio

Jinsi TIST inavyotambaa katika maeneo mapya katika nchi yetu, cluster zingine na zingine zaendelea kutengenezwa na cluster zilizopo zaendelea kukua jinsi majirani wanavyoijiunga kutengeza vikundi vypa vya TIST. Faida za TIST zagawanya na kushuhudiwa katika maeneno mapya.

Leo, zaidi ya cluster mia moja thelathini zimetengezwa. Tunafanya kazi kwa bidii kuongeza cluster ili ziwe zimefika mia mbili ifikapo mwisho wa mwaka huu.

Twashukuru timu ya TIST ya uongozi katika Kenya kwa kazi yao ya bidii na kujitolea kwao kuhakikisha kuwa kila cluster imejipanga sawa, inatumikiwa vizuri na inasonga mbele kufikia mabao ya TIST.

Kama tunavyojua, twahitaji kufanya kazi pamoja

kusaidia TIST na faida zake kukua. Twaweza kupanda miyi, na kukuza na kutumia njia bora zaidi za TIST kama Kilimo hai, kuboresha kando za mito, kupanda na kutunza miti ya aina tofauti ili kuongeza cluster zetu nguvu tunavyoboresha mashamba na maisha yetu.

Kama kumbusho:

- Cluster yafaa iwe na vikundi vidogo thelathini kufika hamsini
- Vikundi vidogo vya cluster vyafaa viwe vimekaribiana na mahali pa mikutano hadi umbali unaoweza kutembewa kwa miguu
- Cluster yafaa kuwa na shamba lisilopungua hekari mia moja lililotengwa kwa upanzi wa miti
- Cluster yafaa kuwa na miti isiyopungua mia

mbili iliyo hai

- Cluster yafaa kufanya uhesabu miti makini na mafunzo ya hali ya juu.
- Cluster yafaa kuwa na miche wanayohitaji katika mwaka tosha katika minanda yao. Kila kikundi kidogo chafaa kupanda miti isiyopungua elfu moja kila mwaka ili wawe na miti elfu tano katika mwaka wa tano.

Cluster nzuri yafaa kufanya nini?

- Cluster yafaa kufanya uchaguzi kila miezi mine kuchagua mwajibikaji wa cluster ambaye atazunguka viti nya uongozi
- Cluster yafaa kukutana kila mwezi ili kupata mafunzo, kugawana njia bora za kufanya mambo, kupeana mazingira Bora, malipo na mambo mengineo.
- Katika mikutano ya cluster, wawakilishi wanafaa kugawana ujuzi bila kuficha lolote na wanacluster wengine, kwa mfano jinsi pesa za cluster zilivyotumika.
- Katika mkutano wa cluster wa kila mwezi, cluster yafaa kutuma rekondi ya mkutano wa cluster na fomu ya uwajibikaji kwa kutumia kifaa kinachoitwa Palm.
- Cluster yafaa kuhitisha wahesabu miti ili kuhesabu miti inapohitajika

- Cluster yafaa kuhakikisha kuwa uhesabu miti ni wa makini
- Cluster yafaa kuboresha data ya vikundi vidogo ili miti mingine iweze kuingia katika soko la hewa. (iliyopo katika maagano ya miradi ya kaboni)
- Cluster yafaa kufanya bidii kufanya malipo kwa kila kikundi.
- Cluster nzuri inaingiza na kufunza vikundi vipyta. KUKUA hufanya mradi wa TIST kuwa yenye nguvu zaidi! Cluster yafaa kujigawa na kuwa mbili inapofikisha wanacluster mia nne.

Wafaa kufanya nini ukihitaji usaidizi?

- Ili kupata maelezo zaidi kuhusu hali ya data ya uhesabu miti, ongea na Martin Weru 0722846501
- Kwa maelezo zaidi kuhusu vifaa (Palms), ongea na Charles Ibeere 0720474209
- Kwa maelezo kuhusu kupanua cluster yako, ongea na Eunice Wambui 0724431071

Katika mkutano wa leo, ongea na timu ya utumikaji ya cluster yako na wawakilishi wa cluster. Cluster yako ina miti mingapi leo? Waweza kufanya nini leo ili kufanya cluster yako kuwa na nguvu? Katika TIST, twaweza!

Kujenga kesho iliyo na mwangaza kwa watoto wetu: miti ya aina mbali mbali husaidia!

Umeletewa na Aaron Kaindio

Unapopanda mti, juu kuwa unasaidia ata vizazi vijavyo ili viwe na mazingira mazuri, masafi na yenye urembo. Watashukuru kwa kuwa tulifanya kazi kwa bidii sana kupigana na mabadiliko ya tabia nchi na kumaliza umasikini. Hii ndiyo sababu sisi katika TIST tunachagua ni miti ya aina gani kupanda katika mashamba yetu na kando ya miti. Tunapanda sit u kwa ajili yetu, bali pia kwa watotoo wetu na wao.

Miti mingine yaweza kuumiza mazingira yetu katika maeneo mengine, ata ingawa ina faida nyinginez. Miti kama mikaratusi hukua haraka sana kwa sababu inachukua maji na virutubisho vya udongo vingi. Kwa sababu hii, mti huu waweza kuwa mzuri kwa sababu za kibiashara lakini waweza kuumiza mazingira katika maeneo mengine, san asana kando ya mito na ardhi oevu. Haikui vyema katika mashamba tunayotaka kupanda mimea mingine na yaweza kufanya udongo kuwa mibaya kwa mimea ata baada ya miti kukatwa.

Tunapanda miti, ambayo itakaa muda mrefu

(miaka thelathini au zaidi) kama inavyohitajika katika masoko ya hewa chafu). Wakulima katika vikundi vidogo vya TIST walio na asilimia kubwa ya mikaratusi vyafaa kujaribu kufikia mapendekezo ya TIST ya kuwa na asilimia isiyozidi asilimia thelathini na tatu, kwa kupanda miti ya kiasili katika mashamba mapya au kupunguza mikaratusi na badala yake kupanda miti mingine, sana sana miti ya kiasili. Hii ni muhimu hasa kando ya mito. Kumbuka kuwa serikali inakataza upanzi wa mikaratusi karibu na mito na maeneo yaliyozunguka mito. Panda miti ya kiasili iliyo mizuri kwa maji katika mashamba yaliyo karibu na mito. Utakuwa unafanya mito kuwa bora zaidi kiafya kwa familia yako, kwa watu walio chini ya mto na kwa vizazi vingi vijavyo.

Acheni sote tufanye haya ili tuweze kuendeleza mradi wetu wa TIST na pia mazingira yetu yote. **Aliyeandika ni Mhesabu miti wa TIST, Kigucwa Cluster. aronkandio@tist.org.**

Mradi wa kulima ndengu katika Cluster.

Umeletewa na Jennifer Kithure

Cluster za TIST zimeanza zoezi lingine bora zaidi: upanzi wa ndengu ili kupata pesa zaidi na kwa sababu za kilishe katika familia zetu. Tumeanza na cluster kumi na mbili ambazo kupitia mradi wa Saidiwa usaidie, tutapatambaza kwa cluster zingine misimu ijayo.

Cluster hizi zilizoanza ni Mumbuni, Kieng, Kaanwa, Mworoga, Giaki, Matakiri, Kirindini, Nkondi, Tunyai, Gachuua, Kawiru MCK na Mikinduri.

Katika kila cluster kati ya hizi kumi na mbili, memba watano walipewa kila mtu kilo tano za ndengu za aina ya N26 za kupanda katika ekari moja. Kwa sababu ya shida ya mashamba madogo katika maeneo mengine, katika cluster zingine, wakulima waligawana mbegu ili kusaidiana, na kila mmoja akapanda katika nusu ekari ya shamba lake. Mavuno ni januari, na kama ilivyoahidiwa kugawana kutokana na mavuno yao ili wakulima wengine wawili katika cluster yao waweze kupanda msimu hujao. Mpaka sasa, mwezi wa februari, walioanza watapitisha kilo tano za ndengu aina ya N26 kwa wakulima wengine watatu katika cluster yao.

Maelfu ya wakulima wa TIST wanataka kupanda ndengu, kwa sababu za kimalisho na kupata pesa, kwani ndengu hukua vyema ata mahali penye mvua chache. Walioanzisha walifunzwa kuuza ndengu katika Semina. Mnaweza kupanganisha cluster yenu ili muanze kukuza ndengu. Yafuatayo ni mambo unayofaa kuweka akilini katika soko la ndengu:

Jicho la Biashara.

Hii ni njia ya kibiashara ya kuendeleza biashara na lengo la kupata faida kubwa zaidi. Ili kufanikiwa, mwenye biashara anahitaji kujua mambo yote yanayohusika katika kuendeleza biashara yake kwa akili ya kibiashara. Inahusisha kuchambua kila hatua ili kubaini gharama na faida. Vikundi vya uzalishaji vyahitaji wanachama kujihami kuzalisha kwa ajili ya kupata mapato. Mapato yanapatikana yafaa kutosha kugharamia gharama iliyohusika katika uzalishaji na kutengeza faida bora kwa wanachama.

Kuleta biashara katika jamii kunahusisha:

- I. Kuhakikisha kuwa biashara inatumia njia ya kibiashara katika ngazi zote ili kuwezesha mtazamo wa gharama chache-thamani bora kati ya wazalishaji, ili kuleta faida bora.
2. Wazalishaji wanaofanya utafiti rahisi wa soko

ili kubaini nguvu zao na fursa za soko zilizopo.

3. Wazalishaji wanaofanya biashara walio na miongozo wazi ya uanachama na ugawaji wa wajibu na majukumu
4. Vikundi mbalimbali vya uzalishaji vinavyojunganisha kutengeza biashara kubwa zinazojulikana tena kama vijiji vya kibiashara ili kuzalisha tosha kwa ajili ya masoko ya taasisi, rasmi na makubwa.
5. Kuanzisha miundo ya utawala ya vikundi vya uzalishaji.

Kuendeleza Cluster za TIST kibiashara.

Hii ni njia ya inayoongozwa na soko ambayo cluster kawaida za TIST zinaendelezwa kibiashara na kuwezesha kukidhi mahitaji ya masoko ya sekta binafsi na pia kuongeza ushiriki wa vijiji vya kibiashara katika minyororo ya thamani. Vijiji vinawezeshwa kufanya kazi kama viungo vya kibiashara ili kufikia uzalishaji mkubwa wa mashamba, kuzalisha thabiti, kuboresha mazao na kuleta vifaa kutoka nije na kufikia ufanisi.

Inalenga:

- a. Kuhamasisha vijiji vya kijamii kufanya vikundi vya uzalishaji vya kibiashara (CPG).
- b. Kuunganisha wakulima wa vikundi vidogo na vijiji kuingia katika minyororo ya thamani.
- c. Kuongeza uwezo wa cluster kuwa wana soko wenye heshima.
- d. Kuongeza ushindani kati ya wenye mashamba madogo.

Faida za kuendeleza Cluster kibiashara.

Faida kubwa zinazotokana na kuifutilia hii njia ni:

- a. Ukusanyaji, usafirishaji, usindikaji na uuzaji wa mazao wa pamoja ulio bora na fanisi.
- b. Msada katika uzalishaji katika kilimo kwa wanachama kupitia usambazaji wa pembejeo za kilimo.
- c. Usambazaji wa teknolojia inayotumika kwa wanachama.
- d. Utoaji wa mikopo kwa wanachama kwa gharama za haraka kama karo, mazishi na pesa za hospitali kwagharama nafuu.
- e. Nafasi za ajira kupitia kujajiri katika sekta hii.
- f. Uuzaji wa pamoja unaongeza mazao kwa hiyo kuongeza nafasi ya kuvuta wanunu zaidi.
- g. Uzalishaji wa kikataba kwa vikundi.

- h. Mipango sahihi ya kuweka pesa husaidia wanachama kupunguza usimamizi mbovu wa pesa kwa kikundi na kwa wanachama.
- i. Mipango ya kikundi kuhusu nafasi zinazowezekana za kibiashara.
- j. Vikundi vilivyojipanga huvuta wafadhili wa kusaidia miradi ya vikundi.

Mabingwa wa ndengu katika cluster za TIST wapo katika cluster zote kumi na mbili zilizoanza kulima ndengu. Watasaidia katika uzalishaji, kukusanya mbegu na uuzaji. Hili litatendeka pamoja na ushauri na usaidizi wa Farm Concern International, ambao waliwafunza wabingwa kuhusu mambo yaliyotajwa katika makala haya.

Majukumu ya mabingwa wa ndengu.

- I. Kutathmini mara kwa mara hali halisi ya uzalishaji wa ndengu na kuchunguza matatizo ya maslahi ya pamoja katika uwanja huu;
- II. Kutayarisha ratiba ya uzalishaji itakayotumiwa

- na vikundi vya uzalishaji.
- III. Kuhakikisha uratibu wa juhud na ushirikiano wa vitengo vya uzalishaji.
- IV. Kujadiriana na wamiliki hisa wengine kuhusu mada za kiufundi zinazohusu uzalishaji na uuzaaj wa ndengu.
- V. Kutengeneza mpango wa uzalishaji na uuzaaj wakishauriana na wazalishaji wengine
- VI. Kukuza ugawanaji wa wajibu wa usimamizi wa rasilimali na upangaji katika Nyanja tofauti za serikali, wakulima na wamiliki hisa wengine.
- VII. Kutoa miongozo juu ya maendeleo endelevu ya maliasili nay a kimwili kwa wakulima.

Jua zaidi kuhusu ndengu leo! Kama cluster yako ipo katika eneo lililo nzuri kwa ukulima wa ndengu na iwapo una haja ya kuingia ili kumaliza njaa katika eneo letu na nchi yetu kwa ujumla- ongea na Jeniffer Kithure ili kupata maelezo zaidi; namba yake ni 0726319539. Na TIST tunakua, tunamaliza njaa na tunauza hewa safi.

Miti hufanya mazingira kuwa bora kwetu sote.

Katika TIST, sisi hupanda miti ili kuijunga na soko la hewa na kupata pesa kutokana na kuuza hewa chafu. Hata hivyo, faida zingine za miti ni kubwa!

Zifuatazo ni faida chache ambazo sisi (na dunia yote) hufurahia:

- Miti utumika kama makazi asili ya mimea na wanyama wa aina nyingi mbali mbali. Huwapa wanyama pori wanaotafuta makazi mitini hisia ya faragha na usalama na kuwapa chakula. Kulinda bionuwai hufanya mashamba na sayari yetu kuwa na uzalishaji zaidi na kukataa ubadilikaji wa tabianchi na changamoto zinginezo.
- Miti huboresha ubora wa hewa na hupunguza uchafu ulio wa hatari. Miti hutoa hewa chafu ya kaboni na uchafu wa hewa kama dioksidi sulfuri, ozone na oksidi za nitrojeni. Kurudisha, inatupa oksijeni inayohitajika ili kuishi.
- Miti hubhibitit tabianchi kwa njia ya kuwastanisha madhara ya jua, upemo na mvua.

3/4 Ubora wa ardhi kwa macho unaboreshwu kwa kupanda miti, ambayo nayo inaboresha hali ya maisha. Kijani cha miti huongeza rangi ya ardhi na huongeza urembo wa mazingira.

- Miti hudhibiti tabianchi kwa njia ya kuwastanisha madhara ya jua, upemo na mvua.

Yaweza kusaidia kuzuia mafuriko, maporomoko ya ardhi na uharibifu wa upemo. Miti huwastanisha madhara ya mafuriko kwa kuruhusu maji ya mvua kuingia udongoni badala ya kupitia juu yake.

- Miti hupunguza mmomonyoko wa udongo. Mizizi ya miti hushika udongo ambao ungeoshwa na maji ya mvua na mafuriko. Miti pia husaidia kuboresha rutuba ya udongo. Udongo wenye rutuba huhamishia virutubisho kwa chakula, jambo ambalo huboresha afya ya binadamu.
- Miti hunyonya kelele. Uchafuzi wa kelele waweza kupunguzwa kwa njia ya kupanda miti mingine na mingine.

Mahitaji ya maji masafi ya kunyua yaweza kufikiwa kupitia kupanda miti ya kiasili. Misitu na mimea hupunguza mwendo wa maji ya mvua na kuyaingiza udongoni. Mwendo ukipunguzwa, maji ya mvua yanaingia ardhini kujaza mashimo yaliyo chini ya ardhi ambayo tunategemea kwa matumizi yetu. Miti pia hufunkia miti, yakiyafanya maji kukaa baridi na kupunguza kupotea kwa maji kupitia uvukizi.

Miti ya kienyenji inayokua haraka.

By Christine Yankel

Miti ya kiasiri hutupatia faida tofauti. Mwezi huu tunaangalia baadhi ya miti ya kienyenji ambayo ni ya manufaa na kukua kwa haraka. Kwenye poli miti hii hukua haraka ikiwa imekatwa au kuchomwa na moto. Jadiliana na walimu au vikundi vyatya cluster kuhusiana ma miti hii na hasa ile inayomea huku kwetu.

***Hagenia abyssinica*, African redwood, muhooru**

Mbao yake ya rangi nyekundu inapendeza sana na imamea haraka kwa kufikia meter 20, *Hagenia abyssinica* ni mtu mzuri na unakua ukienda juu na pia unafanya vizuri mahali kuna mvua ya kima cha 1,000 to 1,500 mm kwa mwaka. Ina manufaa mingi kama matawi yake inatoa rutuba. Inatumika kama dawa. Pia inatumika kwa kuzuia mmomonyoko wa udongo. Muti mwenyewe unatoa kuni na makaa mazuri sana na pio mbao.

Muti mwenyewe unamea kutokana na mbegu yake. Haihitaji kunyunyizia dawa. Mbegu inamea kwa munda wa siku 10-20 na inamea kwa muda wa 40-60%.

Ikipandwa na mimea mingine hakikicha umekata matawi ili mtu mwenyewe ukuwe ukienda juu.

***Macaranga kilimandscharica*, mukuhakuha/mukura**

Macaranga ni mtu unaokua haraka sana na unafanya vizuri sana na mimea mingine kama Kahawa ama madizi. Inafanya vizuri sana wakati kuna mvua ya kima cha 1,500 to 2,500 mm kwa mwaka. Kwa sababu ya ukuaji wa haraka wake, inazuia mmomonyoko wa udongo. Ni mzuri sana kwa kuni na kwa kujengea ukuta. Mbao yake ni nzuri sana kwa kujengea masanduku, meaza, viti na kadhalika. Mizizi yake inatumika kama dawa.

Macaranga inamea kutokanan na mbegu yake macaranga. Haihitaji kuchungwa sana ndio ikue.

Mazingira Bora

Ngwatanio yina umi wa ndengu (Green gram)

na Jennifer Kithure

Ngwatanio imwe ya Tist iyambiie umwe wa mawiko maseo wa kuvanda ndengu kwoondu wa kukwata vaita na kwailya uima wa mii ya andu moo. Nitwa mbiie na ngwatanio ikumi na ili ila kwisila nziani ya kutethw'a utethyee (**helped to help**) nikwiana kuvinkia ngwatanio ingi mbuani syukite..

Ngwatanio ithi ni Mumbuni, Kiengi, Kaanwa, Mworoga, Giaki, Matakiri, Kirindini, Nkondi, Tunyai, gachuua, Kawiru MCK na Mikinduri.

Nthini wa kila ngwatanio syi 12, ene atano nimakwatie kilo itano sya ndengu muthemba N26 kuvanda ekani umwe. Nundu wa miunda kunyiva isioni imwe aimi nimaanie imbue na kwavamwe mathi kuvanda kila umwe nyusu ekani ila yake. Ngetha nikwithiwa mwai uyu wambee na kila umwe niweeyumisyen kuaina imi angi eli nikanma mavande mbua isu ingi yukite. Tuivika mwiso wa mwai mbee mwambioni wa February alamambie makanengane 5kg sya ndengu muthemba N26 kwa andu angibatatu.

Itho ya Viasala

Viasala ikunawa na nzia ya kiviasala kwa kwianya' a kila kiili ukunika viasala na kuminenevy kaendea na kukwata vaita munene. Nikana mundu aendee niwaile kumanya kila kikwendeka na vata wa viasala uyu kilikoni kyake ekiite ni viasala nawaile kaendea na kumune vaita. Nivenda kusiisa kwa vakuvi nthini wa kila itambya mundu ukwika kwona vaita na utumiku ula uvikiwa kuete vaita uyu. Ikundi nisyale usisya uimi wasyo na itho ya viasala. Vamwe na kuima undu wa ukwata kya uya withie mundu nutonye kwitethya kumana na kila waima akwata. Vala kuete ukwati nonginya masisyen kana ngalama ila manyi niyamanenge vaita munene vyu kwi ngalama ila mekuthi maiseuvya ukwati uyu kwa kila mwene.

Mbai kulika visalani.

1. Ikiithya kilaviasala ukwambii na waile kwa soko mithemba yonthe nikana withie kwambii ngalama ni nini na vaita ni munene.
2. Mbee niwaile ika ukuninikili iulu wa soko na kwona ulumu na ivuso yila yivo mbee wa kwambii.
3. Ngwatanio iyambiia viasala uyu nimweekia mawalany'o maseo na mwaana mawia kwa kila umwe nesa.
4. Aimi kivathuky'o ma Tist nimaendee na kuka

vamwe na kuseuvya ikundi nene ikwitwa utui wa viasala nikana methiwe na syindu sya utandithya mbianu kwa soko nene ta syivalo sya isomo na masoko manene.

5. Kwia walany'o wa kuungamia ikundi ithi.

Viasala wa ngwatanio ya Tist

Nimaanisya ata:- kutw'a ngwatanio viasala ni kwithiwa kwosa mwoloto wa kiviasala kuatiania na soko ila niyo yikiite bvinya ngwatanio ya Tist kulika masokoni ma kiene na ingi kwongeleka na kulika vi wa asalanikindua(Commercial village). Ndua ithi nthini wa viasala ninenetwe mwanya wa kuthukuma ta viasala kuvikia kunengane kana kutandithya usyao wa muundani mavete kutiia na kumathiia ila matenasyo mavikie wendi wa athooi.

Kii kyelekele:-

- a. Kuthuthya aimi ala methni wa ndua sya unyanya kuseuvya ikundi sya viasala (commercial producers groups(CPG)).
- b. Kulikya tukuni tunini twa aimi nthini wa usimunene wa nyolo ino ya viasala
- c. Kwialya utonyi wa ngwatanio kwithiwa me athauki anene sokoni ithi.
- d. Kwongela usindani kwa ikundi nini kana ala mena umya munini.

Vaita wa ngwatanio kutwika kuthi viasala.

Vaita ula ukwatkanaa kuma nziani ino ni vamwe na:-

- a. Kumbany'a, kukuithya vame na kuatia nzia sya soko syikawa kwa vamwe na iikuaa vinda inene.
- b. Nimakwataa utethyo kwa kunewa mii ya muundani kwa aimi
- c. Kweethiwa na masamo meu nimavikiaa ene kwa mituki.
- d. Nivethiwa kukovethw'a kwa en eta ethiwa mundu ena vata wa mituki ta ndivi ya sukulu kana mathiko, ona mbilu sya sivilali kwa thooa matonya.
- e. Kuseuvya mawia kwa andu kwiyandika ene miundani na viasalani uy.
- f. Kuta vamwe nikwongelaa kila kiutewa na na kwoou kwendeesya aui angi.
- g. Kuima kwa ivinda muandikanite kwa ikundi
- h. Nzia nzeo sya kwia mbesa nitetheeasya ene ikundi ithi na amemba.

- i. Mwalany'o ma undu viasala uyu utonya kuendeeea nimekawa kwa vamwe.
- j. Ngwatanio/ikundi ila syinamawalany'o maseo nikwataa avothi ma ngoo nzeo kumatetheesya.

Ngwatanio sya Tist ila iendee na uvandi wa ndengu syi 12 nisyambiee uimi uyu kwa vamwe. Nimekwambiia ukwatana mbau kwa kuima ndengu na kusyumbany'a vamwe na kuta. Uyu ukeethiwa ethiwa makeetikila woni kuma kwa Farm concern Internationa, ala mamanyiasya iulu wa undu uu.

Kithini kya ikundi na mawia kwa ikundi ithi sya ndengu.

- i. Kwikala maisissa itina wa ivinda undu ndengu iendee na uma na kuthunikia ethiwa ve nthina uvwanene muundani.
- ii. Kwalany'a invinda ya kuivanda kwithiwa yi kwavamwe nundu wa viasala kwa kikundi.

- iii. Kuikiithya kana ngwatanio na vinya wa vamwe niweekiwa kuiima.
- iv. Kuneenanisya mavata ma ndengu kuma kuivanda nginya sokoni vamwe na ene
- v. Kusisya nzia ila yaile kwa ala me kuta sokoni ya vamwe na ala maivandaa.
- vi. Kwendeesya kaaana mawia ma kuungamia kuma ngwatanioni kivathukany'o ta silikali na aimi na angi ala me nthini.
- vii. Kunengane mwoloto iulu wa undu wa kwikalya maindeo ma uthwii wa nthi kw aaimi.

Soma muno iulu wa ndengu, ethiwa ngwatanio yenu yi siioni nzeo ila itonya kuimwa ndengu na wina wendi wa kukwata na angi kuola nzaa nthini wa mbai yenu na nthi yitu kwa vamwe neenany'a na Jeniffer Kithure – 0726 319539 kwa uvo mbeange. Twina tist nitukwinana na kuvetanzaa vamwe na kuta nzeve itavisaa.

Miti nitumaa mawithyululuko methiwa maso kwitu ithyootho.

Nthini wa Tist, tuvanda miti kwosa mwanya nyini wa soko ya nzeve itavisaa na kumita kukwata vvaia. Onakau moseo ala angi tukwataa kuma miniti nimaingi!

Vaa ve amwe kati wamo (ala ona nthi yothe itaniaa) ala tutaniaa.

- Miti niyithiwa ta mawikalo ma malaa . Ninengae nyamu sya kitheka wivitho na liu. Suvia mawithyululuko kuma miundani yitu na ikonyo inya sya nthii ikeethiwa na wumya mwingi vamwe na uvinduku wa nzeve na mathina angi ala maetawe ni miti kwithwa iteve kuoleka.
- Miti niseuvasya nzeve ila tuveaa kwa kuola uthokoanu. Miti niyumasya carbon dioxide ila mbingi kuma nzeveni vamwe na sulfur dioxide na kutunge nzeve ya uveva oxygen.
- Miti niyailasya vandu ukethia nivekwendeesya

ona kwa metho. Ingi mii niyongelaa langi na kwanakavya nthi.

- Miti niyailasya nzeve kwi ivinda ya sua, kiseve kana mbuani. Ingi nisiiia kukuwa kwa muthanga na kwanangika kwa nthi.
- Miti nusuviaa onou wa muthanga nundu miiyayo nikwatanasya muthanga nakumine nzeve vamwe na matu mayo ala moa manengae muthanga unou. Muthanga munou nengae mundu liu museo kwoondu wa uima wake.
- Miti nimelasya kineene na kwoou miti nimiseo twasisya kwa kila ngaliko.

Wendi wa kiw'u kiseo kya unywa no uvikiwe kwa kuvanda miti mingi ya kiene. Miti kaingi nisiaakiw'u yila kwaua kusemba kwoou kikanywa nthi na ingi uyithia kyalika muthangani kikisunge na kikiso kwa kwiswa ta ndovoi na kutumiwa. Miti ingi niyikiaa muunyi mbusini na kwoou kiw'u ukethia kila kimbusini ni kithihu na kiinangala kwa mituki.

Miti ya kithio ila imeaa mituki.

Na Christine Yankel

Miti ya kithio nitunengae moseo mainngi me kivathukanyo. Mwai uu twikunikila miti mina ya kithio ila yi vata muno nundu niyianaa mituki .Kithekani mbai sya miti ino nisyo mbai sya tene na nisyo imeaa mbee na mituki yila sya temwa kana kuvya ni mwaki. Ta amanyiwa na ikundi ingi nini nduan yaku ni miti yiva ila yikaa nesa nduan yenyu ?.

Hagenia abyssinica, African red wood, muhooru.

Kwoondu wa mbwau syayo ndune, na kwiana kwa wo kwa mituki kuvia mita ta miongo ili *Hagenia abyssinica* ni muti museo uivandwa nthi ila mbukilu na ikwataa mbua ya mm katikati wa 1000 na 1500 kila mwaka. Wi mavata maingi, matu mawo ni manoasya muthanga, na ni muti museo uivandwa kula kwi mititu. Ni muti museo kwa uiiti na nusiiiaa muthanga kutwawa, ni muti museo wa mbwau na na ngu na makaa.

Muti uu numeaa mituki kuma mbeuni yawo. Tilasima ukunwe ndawa na mbeu yayo nimeaa katikati wa matuku 10 na 20 itina wa kuvandwa na niyianaa na mituki na uasa 40-60% itna wa mumea

Ethiwa miti uu nuuvandwa muundani vanda wimutaani. Sea mbonge nikana wiane win a muthamba mulungalu.

Macaranga kilimandscharica, mukuhakuha / mukura.

Makaranga ni muti umeaa mitiki na museo uivandaniwa vamwe na kaawa na maiu. Umeea nesa kula kwi mbua ya katikati wa mm1500 na 2500 kila mwaka. Ni muti museo kwa wiio na nundu wakumea mituki nusiiiaa kutwawa kwa muthanga. Muti uu ni museo kwa ngu, kuseuvya masanduku na kwa kwiia wiio. Mii yawo nitumika kwa uiiti. Vanda ngii sya makaranga na muti uu ndwendaa usuvi mwinga wa mina kumea.
