TIST NEWSLETTER AUGUST 2018

Raised Nursery bed made by SG members from
Rutenga Cluster in Kanungu

Quantifiers with a farmer in a conservation plot in Rukungiri

SG members learning how to make energy saving cook stove in Ndeego Muko cluster in Kabale

The TREE is a monthly newsletter Published by **TIST** Uganda, a project area of **The International Small Group** and Tree Planting Program.

MISSION STATEMENT:

TIST Uganda is a community initiative dedicated to empowering small groups of subsistence farmers to combat the devastating effects of deforestation, poverty and drought.

OBJECTIVE STATEMENT:

Combining sustainable development with carbon sequestration, TIST supports the reforestation efforts of over 25,000 subsistence farmers. Sales of carbon credits generate participant income while TIST today also addresses Agriculture, HIV/AIDS, Nutrition and Fuel Wood challenges.

ADDRESS:

TIST Uganda.

Bushenyi Town, Liberation Road - Kitokye Lane

TIST MISSION AND OBJECTIVES FOR THE SMALL GROUPS

TIST Uganda is a community initiative tree planting program dedicated to empowering people and Small Group local farmers.

TIST supports subsistence farmers through community training in best practices like conservation farming.

Combating the devastating effects of deforestation by encouraging tree planting.

Combat poverty and drought, combining sustainable development with carbon sequestration.

Working with Small Groups who want to plant many trees to improve their land and help raise money from fruit trees.

TIST today also addresses agriculture, food and nutrition in families, through group training.

TIST also addresses HIV/AIDS awareness and prevention.

Eradicating fuel wood challenges that lead to deforestation.

TIST works around the world with more groups in more places. In Uganda, TIST has been able to plant sixmillion trees, through 1,977 Small Groups and 12,574 members.

By Hakim Bachwa

USES OF TREES IN OUR COMMUNITIES

- Trees provide shade for both animals and human beings.
- Trees provide wood for making furniture like tables, chairs,etc.
- Trees protect against soil erosion in hilly and sloping areas.
- Trees provide income to farmers in the form of carbon business by sequestering carbon that can be sold to carbon global markets.
- Trees are used as boundary markers on homes and farms.
- Trees are used as fences and hedges to protect our gardens from being encroached by animals.
- Trees are used as animal feeds (fodder trees).
- Trees clean up air by removing carbon dioxide and creating oxygen for people to breathe.
- Trees help in rainfall formation, thus keeping climate conditions moderate for farming.

By Twijukye Leorine

SMALL GROUP ELIGIBILITY REQUIREMENTS

Are members of your Small Group aware of the requirements of the TIST Program? Do you know what your Small Group has to do to qualify as an active TIST Small Group? Here are the main requirements that have to be met by your Small Group to qualify for the TIST Program:

- There should be 6 to 12 members in your Small Group from at least 3 different families.
- Each Small Group should have a minimum of 1,000 live trees within 1-year after joining the TIST program.
- Each Small Group should have a minimum of 5,000 live trees within 5-years after joining the TIST program.
- Your Small Group should replant trees that die, for any reason, each year for at least 20 years.
- All Small Groups should sign the Greenhouse Gas contract.
- TIST Small Groups should allow TIST quantifiers to come and quantify their trees once a year. Small Groups should organize with other Small Groups in their area to provide food and shelter for the quantifiers during these annual quantification visits.
- Members of each Small Group should meet together to share ideas and best practices every week. If meeting every week is not possible then group members should meet at least once a month.
- Small Group members should provide proof of land ownership or control for land where they have planted TIST trees.
- Small Group members should participate in TIST training to help develop and share best practices with other TIST groups.
- The area where your Small Group is located should have other Small Groups that are all within walking distance of each other, that have planted a combined total of 100,000 live trees within 1-year, with a potential to plant a combined total of 300,000 trees in 5-years.

WE ARE GRATEFUL FOR TIST IN NDEEGO

I am happy that TIST has expanded to our area here in Ndeego where we are mostly affected by landslides. In order to protect our land from being affected by runoff water, we have formed Small Groups in our area to engage in tree planting initiated by TIST Uganda. We are planting trees in hillsides and in water trenches to combat the effect of landslides in our area.

AUGUST 2018 NEWSLETTER

These days' new farmers are being trained about landslide protection through planting agro-forestry trees, fruit trees and indigenous trees. For that matter, we thank the expansion team. For example, Natukunda Jannester, our cluster servant, for her monthly cluster trainings. Really we have learnt how to protect our land from landslides in our area. Long live TIST Uganda,

By Justine

Co-leader Ndeego cluster

FARMERS IN RUBANDA DISTRICT ARE JOINING TIST PROGRAM TO PLANT TREES ON HILLSIDES TO PROTECT THEIR LAND FROM LAND SLIDES

In South Western Uganda, in the newly formed district of Rubanda, people were affected by landslides - mostly Bufundi and Ndeego Sub Counties in Greater Kabale district. These landslides were a result of heavy rainfall downpour on bare hillside areas.

On 27th Sept 2017, seventeen people from Muko sub county died immediately, including a Rev. Fr., eight people were missed and fourteen people were seriously injured and referred to Kabale Regional Referral Hospital. Many people lost their belongings like houses, animals and food crops.

On 28th Sept 2016, people from Ndeego, like Nyansio, Ngabirano Julius, Mwesigye Venald, Baguma Sliver (Councilor Ikumba Sub county), Jackline Kaparaga, Byomuhangi Bernard, Bagyijo Lesta and others lost their belongings, 15 houses, 20 goats, 30 sheep, 40 hens and 80 bags of Irish potatoes were taken by floods due to heavy rainfall.

Due to the above challenges faced by people in the above area, the affected people, together with government officials, requested TIST program to be expanded in their areas to help them through training farmers about tree planting in those bare hillside areas. TIST has expanded to this area and many people have joined the program and are able to plant trees on bare lands for landslide protection. We have started with nursery bed formation and seedlings are ready to plant in September when the rains start.

By Natukunda Jannester

PLANTING TREES THROUGH TIST PROGRAM

We farmers in Muko and Ndeego clusters are interested in planting trees because we have found out that where TIST trees are planted, people were not affected by landslides. Therefore my fellow members let us wake up and plant indigenous trees, fruit trees and other agro forestry trees on our bare land to protect our land as we are being trained in these different tree species which can help us reduce landslides from our landNATHAN

**UJUMBE WA TIST NA LENGO KWA VIKUNDI
VIDOGO**

Tist ugnada nijamii ya mpango wa upanzi wa miti kwa kuwezesha wat una vikundi vidogovyawakulimawandani.

Tist hutoa msafa kwa wa kulima wa kuhifadhi kuitpa mafunzo ya jamii ndani ya mazoezi yaliyo bora kamaukulimawauwekezaji

Kupambana na maambukizo ya ukataji miti kwakuhamasishaupandajimi.

Kupambana na umasikini na ukame kuchanganya maendeleo endelevunakusafisha carbon

Kufanya kazi na vikundi vidogo amba wanahitaji kupanda miti nydingi ili kuboresha mashamba yao na kuwasaidia kuongeza pesa kutoka katika miti za matunda

TIST leo hutoa hutuba kwa ukulima vyakula na lishe bora katika familia kuitiamafunzoyavikundi

TIST pia uhutubia kuhusu ukimwi, mambukizo na kinga kuhusu HIV/AIDS

Kutokomeza changamoto za kuniza mafuta zinazochukulia-katajimi.

TIST hufanya kazi zake karibu puniani na vikundi vingi katika sehemu nydingi. Inchini Uganda

TIST imeweza kupanda miti million sita kuitia vikundi 1,977 nawanachama 12,574.

Nae Hakim Bachwa

UMHIMU WA MITI KATIKA JAMII ZETU

- Miti hutoa kivuli kwa Wanyama pamoja na wadamu
- Miti hutoa mbao za kutengeza viti, meza, na kadhalika
- Miti husimamisha mmomonyoko wa udongo kando kanda mwa milima
- Miti hutoa mapato kwa wakulima kuitia vyashara vya carbon kwa kusafisha carbon inayo weza kuuzwa katika sokola kimataifa
- Miti ina weza pia kutumiwa kama alama ya mpaka kwenye shamba au boma
- Miti hutumiwa kama uzio naua kwa kuzuia mashamba kuto kanyagwa na Wanyama
- Miti ni vya kula vya Wanyama
- Miti hutoa hewa nzuri kwa binadamu kupu mua
- Miti husaidi kuvuta mvua na kubadili ali aliya hewa

NaeTwijukyeLeorine

UHAKIKKI WA MANITIJA YA VIKUNDI VIDOGO

Wana chama wa kikundi chako kidogo wana ufahamu wa mahitaji yampango ya TIST?

Je unajua nini kifanyike ilikundi chako kidogo kihitim kama kikundi kidogo cha TIST? Hapa kuna mahitaji muhimu ambayo lazima kukutana nayo kama kikundi kidogo ili kuhitim kwa mipango ya TIST

- Lazima kuwe na wana chama kati ya 6-12 katika kikundi kidogo na watu hawa watoke katika familia tatu (3) tofauti.
- Baada ya kuji unga na mpango wa TIST kila kikundi kidogo kiwe na kiwango cha chini cha miti hai 1,000 baada ya mwaka mmoja
- Kila kikundi kidogo lazima kiwe na kiwango cha chini cha miti hai 5,000 kati ya myaka 5 baada ya kujiunga na mpango wa TIST
- Kikundi chako kidogo ni afadhali kurudia kupanda miti ilio katwa
- Vikundi vidogo vyote lazima kuweka sahihi ya mkataba wa green house gas
- Vikundi vidogo vya TIST lazima wakubali kwanti faya kuja ili kuwa tembelea na kuhesabu miti zao mara moja kwa mwaka. Kikundi kimoja ni lazima kupange na kingine katika sehemu hiyo ili watoe vyakula na mahala pa kukaa kwa ziara hiyo.
- Kila wana chama wa vikundi vidogo lazima kukutana na kubadilishana mawazo na mazoezi bora Zaidi Kila wiki kama haita wezekana kila wiki basi afadhali mara moja kila mwezi
- Wana chama wa kikundi kidogo lazima kutoa Ushahidi wa shamba au kudhibiti mahali ambao wame panda miti za TIST
- Wana chama wa kikundi kidogo lazima kushiriki katika mafunzo ya TIST ili kuendeleza na kushiriki katika mazoezi bora na vikundi vingine vya TIST
- Eneo ambapo kikundi chenu kidogo kina patikana ni lazima kuwepo kikundi kingine kidogo karibu na munapo fanyia kazi, ili kwa pamoja kupanda jumla ya miti hai 100,000 kati ya mwaka mmoja, na uwezo wa kwa pamoja jumla ya miti 300,000 kwa myaka 5

TUKO NA KUSHUKURU KWA TIST HAPA NDEEGO

Niko na furaha kwamba TIST ime panuka hadi katika sehemu ya kwetu ndeego mahadi tuna matatizo ya mmomonyoko wa udongo. Kwa kutusaidia kuzuia mtiririko wa maji, tuli anzisha vikundi vidogo katika eneo letu na kushiriki katika upanzi wa miti ulio anzishwa na tist Uganda.tuko tunapanda miti katika milima na kwenye chemichemi za maji ili kupambana na mmomonyoko wa aridhi katika eneo letu.Siku hizi wakulima wanapewa mafunzo juu ya kuzuia mmomonyoko wa aridhi kipitia kilimo cha misitu,miti za

matunda na miti ya asili kwa sababu hiyo, tuna shukurutimuyau-panuzi.

Kwa mfano, Natukunda Jannester, cluster mutu mishi wetu, kwa mafunzo yake ya kila mwezi, ukweli tume jifunza namna ya kukingga aridhi yetukatikaeneoletu.

Nae Justine: Co-leader Ndeego cluster

WAKULIMA WA WILAYA YA RUBANDA WANAJIUNGA na MPANGO WA TIST KUPANDA MITI KANDO YA MILIMA ILI KUZUIA MMOMONYOKO WA ARIDHI

kusini magharibi mwa Uganda, katika wilaya mpya ya rubanda, watu wali athiriwa na mafuriko hasa hasa bufumbi na ndeego sub – counties katika mkoa wa kabale. Hii ili tokana na mvua kubwa ilio nyesha katika sehemuhiyoyenyemilima

Mnamo tarehe 27/09/2017 watu 17 wali fariki papo hapo kukiwemo nae Rev. Fr. Watu wanane hawakujulikana mahali waliko na watu kumina wane wali pata majeraha mabaya na kupelekwa katika hospitali kuu ya mko wa kabale. Na watu wengine wali poteza vitu vyao kama nyumba, mifugo na vyakula.

28/09/2016, watu kutoka ndeego, kama nyansio, ngabirano Julius, mwesigye venald, baguma silver (councilor igumba sub-county), jackline kaparaga, byomuhangi Bernard, bagyiyo lesta na wengi-neo walipoteza vitu vyao. Nyumba 15, mbuzi 20, kondoo 30, kuku 40 na mifuko 80 ya viazi vya kizungu vili

pelekwa na mafuriko kufuatia mvua kubwa ilio nyesha wakati huo. Kwa changamoto hiyo walio pata watu wa maeneo yilio tajwa, watu walio athiriwa, pamoja na maafisa wa serikali, waliomba mafunzo ya TIST ipanuliwe katika maeneo yao kipitia katika mafunzo kupewa wakulima kuhusu upandaji miti kando ya milima ilio wazi. TIST ime panua hadi eneo, na watu wengi wame jiunga na mpango na wana weza kupanda miti kwamashambayaliowazi.

Kwa kuzuia mmomonyoko wa aridhi. Tume anza na vitalu, tayari mbegu zime mea na zita pandwa mwezi September mvua itakapo anza kunyesha

NaeNatukundajennester

KUPANDA MITI KUPITIA MPANGO WA TIST

Sisi wakulima wa muko na ndeego clusters tuko na nia ya kupanda miti sababu tume gundua kwamba mahali miti za TIST zili pandwa, watu hawa kuathirika na mafuriko. Kwa hivyo wana chama wenzangu tuamkeni tupande miti ya kiasili,miti za matunda katika arithi yetuwazi ili kuzuia uwaribifu wa mashamba vile tulivyo funzwa, kwa kupanda miti tofauti itakayo tusaidia kupunguza mmomonyoko wa aridhikatikamashambayetu.

Maisha marefu tist Uganda
