TIST: Guidelines on Re-opening Cluster Meetings.

TIST Leadership Council has been carefully considering your request on re-opening Cluster Meetings. Since April 2020, at the onset of Covid-19 pandemic, we decided to stop both Cluster meetings and field quantifications as a measure to protect everyone involved in TIST from Corona virus infection.

We have since allowed Field Quantification under careful guidance that adhere to Covid 19 protocols.

Many of TIST Farmers have been asking we resume Cluster meetings and trainings. In order for us to resume Cluster meetings , the first consideration is your own personal level of awareness and safety. Covid-19 has proved to spread quickly and widely within a short –time.

However, if we adhere to Government directives, we can significantly protect ourselves, our loved ones and communities we interact with.

Personal Safety Measures.....

Wear a face mask.

Remember this is a legal and safety requirement. It is illegal to be in public places without a face mask. We should at all times wear a face mask. It is important that you put in a clean and disinfected mask. If you happen to buy a cloth mask, please make sure you wash it with soap and some disinfectants such as Dettol before using it.

Keep Social distance.

During your Cluster meeting, make sure you keep a physical distance to of 1.5 - 2m from one person to the other.

Wash your hands.

At your Cluster meetings Venues, TIST will provide you with water and soap for hand washing. Please make sure you clean your hands with running water and soap.

Avoid handshake.

At your Cluster meeting, it is highly recommended that you avoid handshake or hugging

When You Should NOT attend a Cluster Meeting.

1. If you are unwell, for whatever reasons, please don't attend a Cluster Meeting. If you have flu like symptoms such as dry cough, fever, difficult breathing, etc please, first isolate yourself from family members as you seek medical care.
2. These symptoms DO NOT mean you have Covid-19. But it is important to get checked from medical facility.
3. If you have a pre-existing condition such as diabetes, high blood pressure, Respiratory conditions such as TB, asthma etc, please do not attend a Cluster meeting. People with these conditions are more vulnerable to getting infected and that's why it is important to let them not come to the meeting where incase one people has covid, these people will be at high risk.
4. If you are an elderly person with weak immune system, please do not attend a Cluster meeting for now. Elderly people tend to have low immune system and therefore their bodies are unable to fight diseases. As such, they can easily contract the disease. So, please allow them to stay at home.
5. When you have small children below the age of 6 years, please do not bring them to the Cluster meeting. Children like elderly people have weaker immune system and that's why it is important not to expose them.
6. If you have recently traveled from high risk areas, please don't attend the Cluster meeting. Studies have shown that covid-19 germs can get into your body and you still continue to feel healthy, yet at the same time you are unknowingly spreading the virus to other people. For this reason, please try to keep yourself away from meetings and in other social gatherings.

7. If you have come into contact with someone who has tested positive to Covid 19, please do not attend the Cluster meeting.
8. If you have recently tested positive for covid - 19 and you are getting your treatment at home, please do not attend Cluster meetings even if you feel healthy until doctors test you again and become negative.

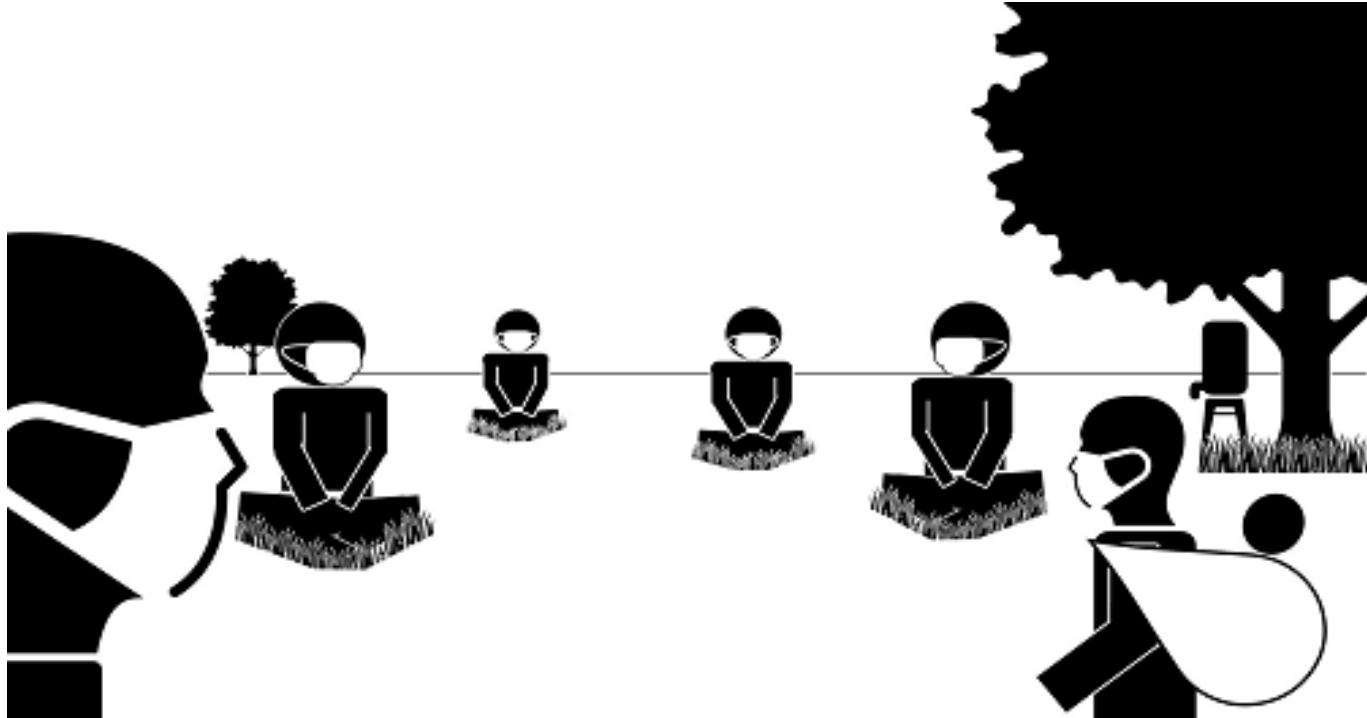

When To Stop Cluster Meetings.

1. If the Government officials (both at national or local level) ask you to stop meetings.
2. If there is a reported a case of Covid - 19 within your Clusters or nearby areas.

What You Need To Do Every Cluster Meeting.

1. Keep records of names and contacts of participants.
2. Make sure Everyone has washed their hands with soap and water.
3. Make sure Everyone has put their Facemask on and in a proper way throughout the meeting.

4. Keep your meeting short (1 hour meeting is recommended).
5. Remember, attendance of Cluster meetings is voluntary.
6. You can still learn more about what's going on in TIST through.
 - Monthly Mazingira Bora Newsletter.
 - You can have your questions answered by calling directly to TIST Answer Desk line – displayed at the cover page of this Newsletter.

A Cluster Meeting demonstration

TIST: Leadership and Governance in your Cluster.

Today, TIST has more than 200 Clusters. In each cluster, Servant Leaders support our success and share their strengths. Each Cluster has governance and leadership as follows:

Elected Cluster Leadership.

- Cluster Leader.
- Cluster Co-leader.
- Cluster Accountability person.

Cluster Leaders, Co-leaders, and Accountability person serve in each position for a period of four months. After four months of service, the Cluster leader rotates out. The Co-leader becomes the Leader, while the Accountability person becomes the Co-leader.

Women and men alternate in the elections. If the Accountability Person is a man, the next one elected will be a woman. Your Cluster should democratically elect a new Accountability person. Cluster elections are important and mandatory for all TIST Clusters.

Role of Cluster Leadership

Role of a Leader.

- 1) Should be a servant to the whole Cluster and exemplify TIST Values.
- 2) Leads/facilitates Cluster activities: coordinates Cluster meeting, quantification and training schedules with other servant leaders.
- 3) Motivates groups to achieve big results, especially planting trees and practicing CF.
- 4) Helps the Cluster to remain strong and united.
- 5) Helps plan for well-organized Cluster Meetings with other servant leaders and making sure the meetings are properly led and trained.
- 6) Works with Accountability Person to ensure that Cluster Meeting and Accounting records are kept properly.
- 7) Works with Accountability Person and Cluster Servant to ensure monthly Cluster reports and Account reports are accurate and sent.
- 8) Helps recruit and train more Small Groups to be registered.
- 9) Helps Small Groups have their Greenhouse

Gas contracts signed, scanned and uploaded, if necessary.

- 10) Welcomes and introduces any new visitor who might attend the meeting.
- 11) For payments, they get vouchers and other materials ready before Cluster meetings. Works with Accountability Person to make sure the proper payment process is followed, and communicates any questions or problems to TIST leaders and Cluster Servants. They remind Small Group members of the next meeting.

Role of an Accountability Person.

- 1) Receives Cluster Budget and announces amount received and spent at each Cluster meeting.
- 2) Works with the Cluster to plan how to use the Cluster Budget to achieve big results.
- 3) Keeps and maintains Cluster records in an organized Cluster record book, accurately and in proper condition.
- 4) Allows inspection of Cluster Records by Cluster members and TIST leaders.
- 5) Organizes with Cluster Servant to send both Monthly Cluster meeting and Accounting reports every month.
- 6) Trains the next accountability person.
- 7) Helps and supports other servants to serve the Small Groups.
- 8) During payments, they hand out vouchers to groups with at least two members present, reviews vouchers, communicates with payment support coordinators, and follows the payment process accurately and honestly.
- 9) Evaluates Quality of Cluster Trainings and reports to GOCC.
- 10) Attend GOCC meetings as Cluster Council Representative.

Role of a Co-leader.

- 1) Takes over when the leader is not there, while the co-leader is to serve both the Cluster members and the Cluster leader.
- 2) Helps keep time during Cluster meetings.
- 3) Takes records during the Cluster meetings.
- 4) Read the previous minutes to the meeting and keep record of the minutes and discussion held in the cluster.

- 5) Helps train newly elected Accountability People.
- 6) Evaluate quality of Cluster Trainings and report to GOCC.
- 7) Attend GOCC meetings as Cluster Council Representative.

Role of Group of Clusters Council Representatives.

- 1) Discover and share Best Practices from Clusters.
- 2) Assure high quality training for the Clusters following TIST Values.
- 3) Assure high quality quantification following TIST Values.
- 4) Maintain working equipment for training and quantification.

- 5) Report concerns and make recommendations for policies to Leadership Council.
- 6) Expand TIST through present Clusters.
- 7) Hold Administrative Hearings if a Cluster Servant is suspended, to investigate facts and make recommendations on suspension.
- 8) Hold Administrative Hearings if a Cluster Leader is not following TIST Values.
- 9) Recommend people from the Group of Clusters for additional TIST responsibilities such as Auditor, TSE, or Master Trainer and other responsibilities.
- 10) Receive Quality of Training Evaluation reports and send them to the Leadership Council.

Kujengana: Don't miss the blessing for your Small Group and Cluster.

Kujengana is a very important part of your Small Group weekly meeting. It says in Ephesians 4:15 - 16 that we are to build each other up into the fullness of Christ. Each person in your TIST Small Group brings his or her own special talents and gifts to the entire group. One of the wonderful things that happen in the Small Group is recognizing, sharing and using those God-given talents.

Kujengana is a way to let those talents be seen and be used. There are two parts to Kujengana:

- Before the closing prayer, every person in the group says one specific, positive thing that the leader for that week did at that meeting. For example: they smiled, kept to time, made good plans, encouraged all group members to speak, greeted me and made me feel welcome, pointed out something that was going very well in the meeting or in the work the group was doing, etc. Each member needs to say something different. This is not optional. Everyone gives Kujengana to the servant leader. Some groups also give Kujengana to the co-leader.
- In addition, if someone sees a gift shown by the leader, a group member can also say that.

With Rotating Leadership, each week a new leader will receive Kujengana. Through Kujengana, we encourage each other on the good things that week's leader did in the meeting and the talents the person showed. Kujengana is also the way we learn to look for positive things about people and then say them. We all need to train our tongues to say the positive. In addition, the whole group learns what that group thinks is important in a servant leader. The next leaders will benefit from what they have heard in Kujengana about previous leaders and know what the groups think is important in being a servant leader.

In response to Kujengana, that week's servant leader just says, "thank you" after each group member's specific, positive statement. There is no discussion about how it could have been done better, or differently. Often, the person is happy when he or she is told the good things he or she did during the meeting. Sometimes we learn things about ourselves we didn't know! Kujengana helps the leader on that day recognize his or her talents and keeps on using them. Kujengana also helps the Small Group because all the members improve their servant leadership as they learn. Kujengana is a double blessing!

Thinning your trees for successful growth — avoid clear-cutting!

We are very proud that almost all TIST members are following the TIST Values and living by the contract that they signed. Very few TIST members have broken the contract, clear cut their trees, and sold them for other uses.

The purpose of having regular thinning is to achieve maximum growth and value of the trees that are left standing. The cuttings also provide firewood, poles, building materials, and other benefits directly to the TIST participant. That is the reason that we have the policy of creating a sustainable forest by only harvesting a maximum of 5% of the trees per year, after the trees are 10 years old.

When an occasional TIST member decides to clear cut their grove, they harm all the rest of the TIST members in their Small Group, in their Cluster and in all of Kenya. The actions of very few people can cause problems for everyone. We expect other Small Group members and members of the Cluster to pay attention and make sure that no one cuts trees before they are supposed to.

When we signed the GhG Agreement, we committed to maintain the trees we plant for TIST to let them grow for 30 years before harvest. This is one reason it's so important to think carefully about what kinds of trees we want to grow on our farms. Thinning and pruning can help keep trees healthy and provide useful products while the trees grow.

The purpose of thinning and pruning trees is to improve individual tree health, as well as overall forest health. This is done by protecting the "best" trees in the forest and thinning the others. For many species like grevillea, eucalyptus and cypress, the trees to thin around are the largest trees, each with a single, straight stem. Trees may have different needs for space depending on species, site, planting style (woodlot, incorporated into crop fields, or windbreak), and climate, but some general principles apply.

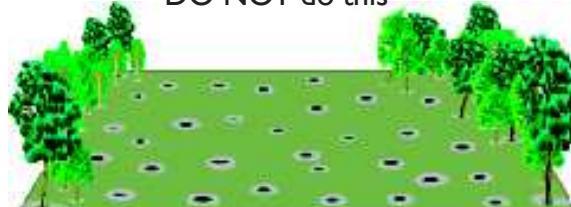

To grow strong, healthy trees, a spacing of two meters or more is recommended. This spacing works for many TIST trees (i.e. grevillea and cypress), but remember some trees require more space like mango and macadamia. Giving trees proper spacing helps them get enough water and nutrients to grow to their full potential. Closer

spacing is acceptable when trees are young. As the trees begin to mature, some trees will be larger and more robust than their neighbors. These are the trees that should be kept. In determining which trees should be removed, look at the best trees and determine if they are appropriately spaced. If they are not, you should remove some nearby trees. When making thinning choices, remember that growth rate varies greatly by species. If a mango tree is growing near lots of eucalyptus, the mango may be far smaller and slower growing than the fast-growing eucalyptus, but it certainly should not be cut simply because it is smaller! A mango tree is of great importance due to its usefulness in producing fruit for food and sale.

Best Practices while Thinning.

- Allow crop trees to grow to maturity
- Thin to proper stocking (number of trees per acre). In TIST, we can select up to 5% of our trees, after 10 years, thinning by selecting as they grow, and providing income.
- Remove dying, diseased, decaying, and poor quality trees
- Protect trees from logging damage
- Use low-impact logging methods
- Promote tree species diversity
- Monitor your forest for insect and disease outbreaks
- Cooperate with government agencies in controlling forest insect and disease outbreaks
- Prevent wild fire

TIST: Mwongozo wa Kufungua upya Mikutano ya Nguzo.

Baraza la Uongozi la TIST limekuwa likizingatia kwa uangalifu ombi lako juu ya kufungua tena Mikutano ya Nguzo. Tangu Aprili 2020, mwanzoni mwa janga la Covid-19, tuliamua kusitisha mikutano yote ya Cluster na upimaji wa uwanja kama hatua ya kulinda kila mtu anayehusika na TIST kutokana na maambukizo ya virusi vya Corona.

Tangu wakati huo tumeruhusu Upimaji wa Shamba chini ya mwongozo makini ambao unazingatia itifaki za Covid 19.

Wakulima wengi wa TIST wamekuwa wakiuliza tuanze tena mikutano na mafunzo ya Cluster ili tuweze kuendelea na mikutano ya Nguzo, uzingatiaji wa kwanza ni kiwango chako cha kibinafsi cha ufahamu na usalama. Covid-19 imeonekana kuenea haraka na kwa upana ndani ya muda mfupi.

Walakini, ikiwa tunazingatia maagizo ya Serikali, tunaweza kujilinda sana, wapendwa wetu na jamii tunazoshirikiana nazo.

Hatua za Usalama Binafsi... ..

Vaa kinyago cha uso.

Kumbuka hii ni mahitaji ya kisheria na usalama. Ni kinyume cha sheria kuwa katika maeneo ya umma bila kifuniko cha uso. Tunapaswa kila wakati kuvala kifuniko cha uso.

Ni muhimu uweke kofia safi na isiyo na viini. Ikiwezekana kununua kinyago cha nguo, tafadhali hakikisha unaiosha na sabuni na viuatilifu kama vile Dettol kabla ya kuitumia.

Weka umbali wa Jamii.

Wakati wa mikutano wako wa Nguzo, hakikisha unaweka umbali wa hadi 1.5 - 2m kutoka kwa mtu mmoja kwenda kwa mwingine.

Nawa mikono yako.

Katika Mikutano wako wa Mkutano wa Nguzo,TIST itakupa maji na sabuni ya kunawa mikono.Tafadhali hakikisha umesafisha mikono yako kwa maji na sabuni.

Epuka kupeana mikono.

Katika mikutano wako wa Nguzo, inashauriwa sana epuka kupeana mikono au kukumbatiana

Wakati HAUPASWI kuhudhuria Mkutano wa Nguzo.

1. Ikiwa hauna afya, kwa sababu yoyote, tafadhali usihudhurie Mkutano wa Nguzo. Ikiwa una homa kama dalili kama kikohozи kavu, homa, kupumua ngumu, nk tafadhali, kwanza jitenge na wanafamilia unapotafuta huduma ya matibabu.
2. Dalili hizi hazimaanishi kuwa una Covid-19. Lakini ni muhimu kuchunguzwa kutoka kituo cha matibabu.
3. Ikiwa una hali ya ugonjwa kama vile ugonjwa wa sukari, shinikizo la damu, hali ya kupumua kama TB, pumu nk, tafadhali usihudhurie mkutano wa Nguzo. Watu walio na hali hizi wako katika hatari zaidi ya kuambukizwa na ndio sababu ni muhimu kuwaacha wasije kwenye mkutano ambapo mtu mmoja ana covid, watu hawa watakuwa katika hatari kubwa.
4. Ikiwa wewe ni mzee mwenye kinga dhaifu, tafadhali usihudhurie mkutano wa Nguzo kwa sasa. Wazee huwa na kinga ya chini na kwa hivyo miili yao haiwezi kupambana na magonjwa. Kwa hivyo, wanaweza kupata ugonjwa huo kwa urahisi. Kwa hivyo, tafadhali wape ruhusa kukaa nyumbani.
5. Unapokuwa na watoto wadogo chini ya umri wa miaka 6, tafadhali usiwalete kwenye mkutano wa Nguzo. Watoto kama watu wazee wana kinga dhaifu ya mwili na ndio sababu ni muhimu kutowafichua.
6. Ikiwa hivi karibuni umesafiri kutoka maeneo yenye hatari kubwa, tafadhali usihudhurie mkutano wa Nguzo. Uchunguzi umeonyesha kuwa vijidudu vya covid-19 vinaweza kuingia mwilini mwako na bado unaendelea kujisikia mwenye afya, lakini wakati huo huo unaeneza virusi kwa watu wengine bila kujua. Kwa sababu hii, tafadhali jaribu kujiweka mbali na mikutano na kwenye mikusanyiko mingine ya kijamii.

7. Ikiwa umewasiliana na mtu aliyepimwa na Covid 19, tafadhali usihudhurie mikutano wa Nguzo.
8. Ikiwa hivi karibuni umejaribiwa kuwa na ugonjwa wa covid - 19 na unapata matibabu yako nyumbani, tafadhali usihudhurie mikutano ya Nguzo hata ikiwa unajisikia mzima hadi madaktari wakupime tena na kuwa hasi.

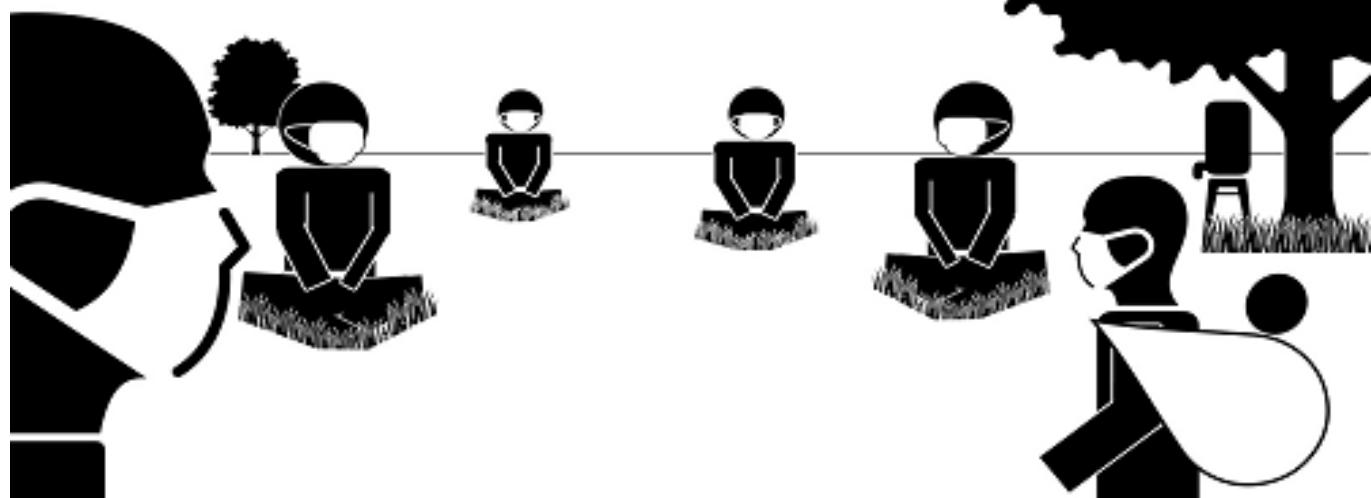

Wakati wa Kusimamisha Mikutano ya Nguzo.

- I. Ikiwa viongozi wa Serikali (wote katika ngazi ya kitaifa au ya mitaa) watakuuliza usimamishe mikutano.
2. Ikiwa kuna kesi iliyoripotiwa ya Covid - 19 ndani ya Makundi yako au maeneo ya karibu.

Unachohitaji Kufanya Kila Mkutano wa Nguzo.

- I. Kuweka kumbukumbu za majina na mawasiliano ya washiriki

Kujengana: Msikose baraka ya Kikundi chenu.

Kujengana ni sehemu muhimu sana ya mkutano wa kila wiki wa kikundi chako. Inasema katika Aefeso 4:15,16 kuwa tujengane hadi tuwe na utimilifu wa Kristu. Kila mtu katika Kikundi chako cha TIST huleta talanta na zawadi zake maalum kikundini. Moja ya vitu vya kuajabisha inayotokea katika kikundi kidogo ni kujua, kugawana na kutumia talanta hizo ulizopewa na Mungu.

Kujengana ni njia moja ya kufanya hizo talanta kuonekana na kutumika. Kuna sehemu mbili za Kujengana:

- Kabla ya ombi la kufunga, kila mtu katika kikundi aseme kitu kizuri maalum ambacho kiongozi amefanya katika mkutano huo. Kwa mfano, alitabasamu, aliweka masaa, alifanya mipango mizuri, aliwatia nguvu wanakikundi wote kuongea, alinisalimu na alinifanya nijisikie nimekaribishwa, alisema kitu kilichokuwa kinaendelea vizuri katika mkutano ama katika kazi iliyokuwa ikifanywa na kikundi, na kadhalika. Kila mwanakikundi anahitajika kusema kitu tofauti. Hili si la kujichagulia. Kila mtu ajenge kiongozi wa utumishi. Vikundi vingine hujenga hata msaidizi wa kiongozi.
- Kuongezea, ikiwa mtu ameona zawadi ilioonyeshwa na kiongozi, mwanakikundi anaweza pia kusema ni zawadi ipi.

Kwa kupitia uongozi wa mzunguko, kila wiki kiongozi mpya hujengwa. Kupitia Kujengana, tunatiana nguvu kati yetu kuhusu vitu vizuri alivyofanya kiongozi wa wiki hiyo mkutanoni na talanta alizoonyesha mtu huyo.

Kujengana pia ni njia ya kujua kuangalia vitu vizuri kuwahuusu watu halafu kuvisema. Sote twahitaji kufunza ndimi zetu kusema yaliyo mazuri. Kuongezea, kikundi chote hujua ni nini kikundi kinafikilia ni muhimu katika kiongozi mtumishi. Viongozi wanaofuata watafaidika kupitia waliyosikia katika Kujengana kuhusu viongozi waliopita na kujua ni nini muhimu katika kuwa kiongozi.

Kujibu wakati wa kujengana, kiongozi wa wiki hiyo atasema, "Asante." baada ya kila mwanakikundi kusema taarifa nzuri iliyomaalum. Hakuna kujadiliana kuhusu vipi kungekuwa kuzuri zaidi ama tofauti. Mara nyingi, mtu huyo hufurahi anapoambiwa kuhusu mambo mazuri aliyofanya wakati wa mkutano. Wakati mwingine, huwa tunajua mambo kujihusu ambayo hatukuwa tunajua!

Kujengana husaidia kiongozi wa siku hiyo kujua talanta zake na kuzidi kuzitumia. Kujengana pia husaidia kikundi kidogo kwa sababu wana kikundi wote huboresha uongozi wao wa utumishi wanapozidi kujifunza.

Kujengana ni baraka mara mbili!

Kupunguza miti yako ili ikue vizuri, jiepushe na kukata miti yote.

Tunajivunia sana kuwa wanaTIST wote wanafuatilia maadili ya TIST na kuishi wakizingatia kandarasi walijotia saini. Ni wanaTIST wachache waliovunja mkataba huo, wakakata miti yote na kuiuza kutumika vinginevyo.

Madhumuni ya kupunguza miti ni ili miti iliyobaki ikue na dhamani yake ipande inavyofaa. Miti hii iliyokatwa pia hutupa kuni, fito, vifaa vya ujenzi na faida nyinginezmo kwa mshiriki wa TIST. Hii ndio sababu tuna sera ya kuanzisha msitu endelevu kwa kuvuna miti isiyopitisha asilimia tano baada ya miti kufikisha miaka kumi.

Wakati mwanaTIST mmoja napoamua kukata shamba lote, wanadhuru wanaTIST wote katika kikundi chao, katika cluster yao na katika Kenya yote. Kwa kweli, matendo ya wachache hao yaweza kuletea shida kila mmoja. Tunatarajia wanakikundi wengine na wanocluster kuwa makini na kuhakikisha kuwa hakuna anayekata miti kabla ya wanapopaswa.

Tulipotia saini mkataba wa makubaliano wa GhG, tuliahidi kutunza miti tunayopanda katika TIST na kuiacha kukua kwa muda wa miaka thelathini kabla ya kuvuna. Hii ni sababu moja ya kwa nini ni muhimu kufikiria kwa makini kuhusu ni miti ya aina gani tunayotaka kukuza katika mashamba yetu. Kupunguza miti na kupogoa kwaweza kusaidi kuweka miti ikiwa yenye afya na kutupa vitu vinavyotumika miti bado ikikua.

Kwa ujumla, maana ya kupunguza na kuipogoa miti ni kuboresha afya ya kila miti, pamoja na ya msitu wote. Hili litafanyika kupitia kuichagua miti iliyobora zaidi katika msitu. Kwa aina nyingi za miti, pamoja na miti ya mba, grevilea, mikaratusi na cypress, miti hii san asana huwa miti mikubwa zaidi, kila miti ukiwa na shina moja lililonyooka. Miti yaweza kuwa na mahitaji mbalimbali ya nafasi kulingana na aina, mahali, ilivyopandwa (miti iliyobora ya mimea ya vyakula ama miti iliyopandwa ili kupunguiza upepo) na tabia nchi, lakini kuna kanuni zingine za kijumla hutumika.

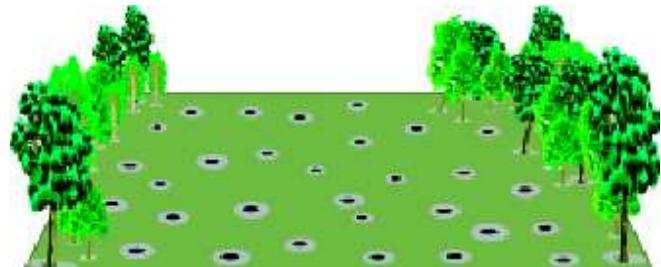

Kukuta miti iliyobora ya nafasi ya miti mbili hupendekezwa. Nafasi hii ni sawa kwa miti mingi ya TIST (grevillea na cypress), lakini kumbuka kuwa miti mingine huitaji nafasi zaidi (miembe na mikandamia, kwa mfano). Kuipa miti nafasi inayofaa huisaidia kupata maji na virutubisho tosha vya kuikuza hadi panapowezekana. Nafasi ndogo zaidi inaruhusiwa miti ilipo michanga. Miti inapokua, miti mingine itakuwa mikubwa kuliko majirani. Hii ndio miti wapaswa kuacha. Kuchhagua ni miti gani ya kukata, angalia miti iliyobora zaidi na ujue kama ina nafasi ifaayo. Kama haina, wafaa kutoa miti mingine iliyobora zaidi.

Unapofanya uhamuzi wa kupunguza miti, kumbuka kuwa kiwango cha ukuaji hutofautiana kulingana na aina ya miti. Kama mwembe unakua karibu na mikaratusi mingi, mwembe unaweza kuwa mdogo na unaokua pole pole zaidi ya mikaratusi inayokua haraka, lakini kwa uhakika haupaswi kukatwa kwa sababu ni mdogo zaidi! Kwa kweli, miti kama mwembe ni wenye umuhimu mkubwa kwa sababu ya matumizi yake katika kupeana matunda ya kula nay a kuuza.

Mazoezi bora unapopunguza miti

- Iruhusu miti kukua hadi ukomavu.
- Punguza hadi inavyofaa (nambari ya miti katika ekari). Katika TIST, twaweza kuchagua hadi asilimia tano ya miti yetu, baada ya miaka kumi, kupunguza kupitia kuchagua inavyokua na kutuletea pesa.
- Kata miti inayokufa, iliyobora ya magonjwa, inayooza na isiyo na ubora.
- Linda miti kutokana na uharibifu kutakana na ukataji wa magogo.
- Tumia njia za ukataji magogo zenye athari chache inapowezekana.
- Himiza wingi wa aina za miti.
- Fuatilia msitu wako ili kujuu kukizuka wadudu na magonjwa.
- Shirikiana na kampuni za serikali katika kudhibiti kuzuka kwa wadudu na magonjwa.
- Zua mioto ya msitu.
