The TREE is a monthly newsletter Published by **TIST** Uganda, a project area of **The International Small Group** and Tree Planting **Program**.

MISSION STATEMENT:

TIST Uganda is a community initiative dedicated to empowering small groups of subsistence farmers to combat the devastating effects of deforestation, poverty and drought.

OBJECTIVE STATEMENT:

Combining sustainable development with carbon sequestration, TIST supports the reforestation efforts of over 25,000 subsistence farmers. Sales of carbon credits generate participant income while TIST today also addresses Agriculture, HIV/AIDS, Nutrition and Fuel Wood challenges.

ADDRESS:

PLANT TREES TO REDUCE MAJOR ENVIRONMENTAL PROBLEMS

Pollution: Pollution of air, water and soil requires us to plant trees that eat carbon that is emitted in atmosphere, water and in soil. Industry and motor vehicle exhaust are the number one pollutants. Plant trees and save lives.

Global Warming: Climate changes like global warming are the result of human practices like emission of greenhouse gases. Global warming leads to rising temperatures of the oceans and the surface of the earth. As you plant trees, this will help reduce the effect of the temperature that is rising due to lack of coolant like trees.

Natural Resource Depletion: Natural resource depletion is another crucial current environmental problem. Let's protect our natural resources like forests and swamps.

Climate Change: Climate change is yet another environmental problem that has surfaced in last couple of decades. It occurs due to rise in global warming. This effect can also be reduced by planting more trees that reduce the number and amount of carbon emitted in atmosphere.

Loss of Biodiversity: Human activity is leading to the extinction of species and habitats and loss of bio-diversity. Eco systems, which took millions of years to perfect, are in danger when any species population is declining. Let's protect animals and plants because they all need each other for survival.

Deforestation: Our forests are natural sinks of carbon dioxide and produce fresh oxygen as well and helps in regulating temperature and rainfall. When we plant more trees in addition to natural forests, the environment and atmosphere will be cleaned from pollutants.

THE CARBON BUSINESS AND MARKET

- As trees grow, they release oxygen into the atmosphere and absorb carbon dioxide from atmosphere.
- When TIST records the tree species, age, circumference and tree numbers, TIST can quantify how much carbon dioxide has been absorbed by the trees.
- When many trees are accurately quantified, the carbon dioxide absorbed creates the carbon credit.

That is how trees impact carbon dioxide.

- As we breathe in our lungs absorb oxygen from atmosphere and release carbon dioxide to the atmosphere.
- We release carbon dioxide into the atmosphere through different activities like:
 - Cooking
 - Manufacturing
 - Driving

By monitoring these activities, we can quantify how much

carbon dioxide we put into the atmosphere. The total carbon dioxide we put in the atmosphere in our carbon footprint.

Companies who want to reduce their carbon footprint and help the environment can pay Farmers to plant trees that absorb carbon dioxide, and by purchasing carbon credits from TIST.

BENEFITS FROM TIST PROGRAM

I am grateful to TIST organization for the tireless efforts they have put in place supporting tree farmers planting trees that are environmentally friendly.

We have gained much in TIST, hence educating our community on environmental degradation. Our community has benefited a lot on tree planting and other programs like stove making and Conservation Farming.

Since TIST has come into existence, droughts and soil erosion have decreased. May you continue supporting us?

KISWAHILI

PANDA MTII NDIE TUPUNGUZE TATIIZO KUU YA MAZINGIRA.

Uchafuzi-wa-mazingira;-uchafuzi-wa hewa,maji na udongo,ina tuyitajika sisi kupanda mtii yene ina kuula kaboni, yene ilihachiliwa kwa Anga, na kwa maji na kwa udongo.

-Viwanda na moshi ya magarii; hi indie nambari moja kwa wachafuzi.sasa panda mtii na uokoe maisha.

-UOngezekolajootowakimatayifa;-mabadiliko ya hali ya hewa sasa,ongezeko la jooto ni matokeo ya mazoezi mbaya kwa wanadamu,sasa chafu ya nyumba ya kijani na Gesi

-UOngezeko la jooto-in a letea jooto ya bahari kuamuka. kwa usoo ya inchi,kama unapanda mtii,hii itapunguza tatiizo kuu ya jooto la bahari yene ina hamuka kwajili ya kukosea chakupoesa kama mtii.

- KupunguakwaRasilimali;-hiinitatiizomupyakwamazingiray-etu .sasatuchunge ma rasilimaliyetusasamsitunakinamasi.

-Mabadiliko ya hali ya hewa;-hii pia nitatiizo kwa mazingira,yene imemaliza mudamurefu. Ina kuja kwa ajili ya uongezeko la jooto,hii tatiizo ina weza kupunguzwa na kupanda mtii, ya kupunguza hidadi na kiasi ya kaboni ilieharibiwa kwa Anga.

- Hasaara ya kibiotofauti;- shughuli ya binadamu ndie ina ongezea kutoweka ya Aina ya mbegu na makazi pamoja na hasaara ya kibiotofauti,mfumo ya kwa kiuchumi yene ilichukua miaka mamillion kukua kamili,ziko kwa hatari kama aina ya mbegu yoyoteinachafuzwa na hewa mbaya inapungukiwa sasa,tuchunge wamnyama navimea ,kwajiliviotevinahitajika kwa kuishi maisha.

- Ukataji wa mtii;- msitu yetu nikuzama ya asili kwa hewa mbaya na kuuza hewa nzuri,na tena inatusaidia kwa kudhibitisha hali ya jooto na mvua,kwa akatitu na panda mtii miingi tukiongeza msitu ya asili,na Anga ya mazingira, itakuasafi kwa kuchafushwa.

BIASHARA YA KABONI NA SOKO.

-Vile mtii,zina komea pia zinaachilia hewa nzuri kwa Anga na kupokea hewa mbaya kutoka kwa Anga.

-Kama TIST ikiandikisha ma aina ya mtii,umrimduara na hidadi ya hewa mbaya iliokufionzwa na mtii.

- Kama mtii,miingi ime hesabiwa kwa usahihi ,hio hewa mbaya ya kaboni ina patikana kawiingi na ina letaa malipo ya kaboni.

-Hii ndie namuna mtii ina shikilia hewa mbaya ya kaboni,kila tukipumua kwa mapafu yetu, hewa nzuri kutoka kwa Anga,na tunaachilia hewa mbaya ikienda kwa Anga.

-sas sisi tunaachilia hewa mbaya ya kaboni kwa Anga ,kupitia kwa shughuli tofauti sasa;-1kupikia,2utengenezaji,3kuendesha.

-Na tukifatilia shughuli hiizo tutaweza kuheasabu hidadi ya hewa mbaya ya kaboni,tulie hachilia kwa Anga. Na ujumla ya hewa mbaya ya kaboni yene tunaachilia kwa Anga ndani ya uchapisaji wa migou yetu kwajili ya kaboni.

-Kampuni yene nataaka kupunguza hewa yao ya kaboni na kusaidia mazingira, ina weza kulipa walimaji,kwa kupanda mtii yene ina shikilia hewa ya kaboni na kunuwa mikopo ya kaboni kutoka kwa TIST.

FAIDA KUTOKA KWA MPANGO YA TIST

-Nina shukuru kwajili ya ushirika wa TIST kwa juhudibila kuchoka,yene wa meweka kwa kusaidia walimaji wenye kupanda mtii,zenye ziiko na urafiki wa mazingira.

-Tume faidika sana ndani ya TIST, kwahivio wametunfunza kama jamii yetu kwa kupoharibiwa ya mazingira.

.-Jamii yetu imefaidika sana kwa upandaji wa mtii na kwa mpango nyingi sana sasa kutengenezajiiko na ulimaji ya uhifadhi.

-Tangu TIST ilikuja kwa jamii yetu,ukame,na Mmomonyoko wa udongo imepunguka.twaomba muzidi kutusaidia.,
