MISSION STATEMENT:

TIST Uganda is a community initiative dedicated to empowering small groups of subsistence farmers to combat the devastating effects of deforestation, poverty and drought.

OBJECTIVE STATEMENT:

Combining sustainable development with carbon sequestration, TIST supports the reforestation efforts of over 25,000 subsistence farmers. Sales of carbon credits generate participant income while TIST today also addresses Agriculture, HIV/AIDS, Nutrition and Fuel Wood challenges.

2021 Profit Sharing Summary

Soon, we will begin distributing 2021 Profit Sharing vouchers, and we have good news to share!

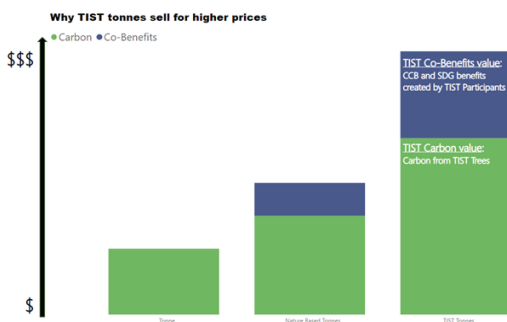

In Kenya, over 8,000 groups are eligible to receive 2021 profit sharing, an increase of more than 2,000 groups from 2020 profit sharing. In Uganda, almost 2,600 groups are eligible to receive profit sharing, an increase of 1,600 groups from 2020 profit sharing.

In Kenya, we will be distributing over 290 million Kenya shillings in 2021 profit sharing, which is 173 million shillings more than last year. In Uganda, we will be distributing over 7.8 billion Uganda shillings in 2021 profit sharing, which is almost 3.5 billion more than last year's profit sharing.

We have also made improvements to this year's profit sharing process to ensure everyone working with TIST receives their fair share of the 70% profit sharing for their work with TIST. This will require some changes to the normal process, including a discussion with your Small Group on the percent each person receives from the profit sharing, and written confirmation of those percentages returned to your Cluster Servant. Please see below for more information on why we are changing the process and how the 2021 Profit Sharing process will work.

What makes up the value of a carbon credit?

The value of a carbon credit is worth much more than the value of the trees planted and the carbon sequestered from those trees. TIST tonnes are valued much higher than other credits of sequestered carbon because of the co-benefits of the TIST tonnes. These co-benefits have earned TIST Triple Gold CCB status with Verra through the work of TIST farmers implementing Conservation Farming, creating clean energy cookstoves, practicing bee-keeping, creating leadership opportunities for all, including women and youth, expanding the program from farmer to farmer, collecting accurate information, and so much more!

(Because there is so much more than the trees that create value in the carbon credit and create profit, we are asking that you discuss

as a group how to split up the money for profit sharing to account for both the trees planted and the work on co-benefits. We will help you with this discussion through our new 2021 Profit Sharing voucher system, which will generate two vouchers. Please read the next article to explain why we are creating two vouchers.

Why are we doing 2 vouchers?

As you saw from the graphic above, TIST is getting much higher prices than other projects in the carbon market. That is because TIST participants are doing activities that help the land, biodiversity, their family health and income, restore riparian areas, and all the other activities make us proud to be in TIST.

The higher prices mean we create extra income and, therefore extra profits for all TIST participants.

So, the first voucher is profits from the carbon tonnes in the trees. We ask you to discuss among yourselves how the "tree" profits should be divided in your group.

The second voucher is profits from our CCB 'Triple Gold' certification, SDG impacts, and things not related to the tree growing. We ask you to discuss among yourselves and decide how those profits should be divided in your group. Who has been the best servant among your group members? Who has done the most for other small groups or for your Cluster? Those people should get bigger shares of these profits to be "fair".

2021 Profit Sharing Voucher Process

Your Small Group will receive two 2021 Profit Share vouchers:

- 1st Voucher: 2/3 of the 2021 Profit Sharing Payment for your Small Group for the tree profits.
- 2nd Voucher: Remaining 1/3 of 2021 Profit Sharing Payment for your Small Group for the co-benefits profits.

Here are the steps from receiving your 1st voucher to the final payment of the 2nd voucher.

For the 1st voucher, you will follow the same process as normal to receive payment.

1. Attend a Cluster meeting where you will receive the 1st and 2nd 2021 Profit Sharing vouchers.
2. After the Cluster meeting, take the 1st voucher back to the Small Group and have it signed as usual.
3. Return the signed 1st voucher to the next Cluster meeting and receive payment immediately.

For the 2nd voucher, you will need to discuss with your Small Group how to share the payment for both 2021 and 2022 Profit Sharing.

4. After the Cluster meeting, take the 2nd voucher back to your Small Group and discuss with your Small Group members (and landowners) to decide what percentage will be paid to each person for both 2021 and 2022 Profit Share. You will receive instructions on how to have this conversation along with your voucher. Please also read the article later in this newsletter to help with the discussion with your Small Group.

5. List each person's name, and the percent they will be paid on the second page of the voucher.

RUNYAKORE

6. Return the signed voucher to the next Cluster meeting and receive payment immediately

After submitting both signed vouchers back to your Cluster Servant, you will have completed your 2021 Profit Sharing payment process! Congratulations!

equal. Thus, everyone should end up being treated fairly, equally, and based on their results.”

How to have a discussion with your Small Group on dividing Profit Share

Discussion Steps:

1. Have a meeting with your entire Small Group and any landowner(s) who gave you permission to plant on their land.
2. Please understand this agreement is for 2021 and 2022 Profit Sharing
3. Discuss what percent of the money should go to each person that has been involved in the Small Group activities including: planting, maintenance, training, creating nursery beds, cookstoves, developing Best Practices, and more.
4. If applicable, determine the percent for the landowner (up to a maximum of 20%).

Discussion Notes:

- Land ownership does not create carbon credits; it is the careful measurement and reporting about the amount of carbon in the living trees on that land.
- If the trees get cut down, the value disappears. TIST must make up the loss of tonnes, and Profit Sharing will not be paid.
- If you do not have proof of an agreement to plant the trees on the land, you need to arrange for that proof that you could show a verifier.
- Also, think about the owner of the land who needs a reason to keep the trees alive so everyone can continue to receive profit sharing

How do we make sure Profit Sharing is fair to everyone?

In the TIST Values, we have agreed that we will be mutually accountable and that we will be servants to each other. That means that we all need to live the” Golden Rule”. We need to make sure that we are treating each other the way we want to be treated.

So that’s what we’re doing with the profit sharing payments. We are working hard to make it “fair” to everyone.

We do that in two ways:

First, we count everything the farmers have done with their trees— all of the tonnes they have sequestered, even if those tons have not been sold.

Second, we make sure that if your Small Group has missed pre-payments - or even an earlier profit-sharing payment - the next profit-sharing payment catches you up, so you are equal. Thus, everyone should end up being treated fairly, equally, and based on their results.”

Jinsi ya kukua na majadiliano pamoja na kundi ndogo juu ya gawaana faida ya shirika.

Hatua ya majadiliano:

1. Kua na mkutano pamoja na kundi lako ndogo yote na wenyeji ya Ardhi,walio kupea rufuusa ya kupanda Mtii Kwa Ardhi yao.

Juu wa majadhiliano hii:

- Wa miliki wa Ardhi, ahii maniahi kuunda mikopo ya kaboni, lakini ni kipimo ya umakini na kujulishaji kuusu kiasi ya kaboni ilimo Kwa mtii muzima kwa Ardhi hiyo.

- Kama mtii Ina kukatwa chini, na thamani Ina towekwa, TIST lazima ifanye Kwa hasaraha ya matanni, na faida ya shirika haiwezi kulipwa.

- Kama auna ushahiidi na karatasi ya makubaliyano kuusu kupanda mtii kwa Ardhi, unahitaji kupanga ushahindi, kama hivyo ita punguza wa kuthibitisha.

- Fikiria kwa watu waili hauzisha kazi ya TIST, waki panda mtii, walie linda mtii muzima, tayarisha kundi ndogo na mikutano ya nguzo, kamilisha Mafunzo, na watu wenye tupea-wezo Kwa kupanda mtii hapoo Kila mwoja kwao niwa thamani.

- Tenna, fikiria pia kwa wenye Ardhi, wenye wanna taka sababu kwa kuchunga Mtii kama bado mzima, kwa hivyo Kila mtu anaweza kuendelea kupokea faida ya kushirikiana.

Tuna wezaje Kuakikisha yakwamba kushirikiana faida hii ni ya haki kwa kila mtu?

Ndani ya thamani ya TIST, sisi tuume kubaliana ya kwamba pande zote mbili tuta wajjibika na tenna tutakua watumishi kwa wenziyetu. hii Ina maniisha yakwamba sisi wote tutayitaji kuhishi na utawala ya dhahabu, tunahitaji Kuakikisha yakwamba sisi tuuapitishwe weanzetu kwanamuna yenye tunataka watu pitize.

Kwa hivyo, sasa hiyo ndie tuko Tunafanyia pamoja na malipo ya faida ya kushirikiana. tuiyiko tunnafanya kwanguvu na Kuakikisha yakwamba ina kua ya haki kwa kila mtu.

Tunna fanyia hiyo Kwa njia mbili:

Ya kwanza, tunna esabu kila kitu ambae walimaji kushafanyia Kwa mtii yao -na matanni yote wamee kamua (kusanyiwa kwa mtii), hata kama hizo matanni kama wajaauzaa.

Ya pili, tunna hakikisha ya kwamba kundi ndogo yenyu imekosa malipo ya kwanza -au kushirikiana ya kwanza ya faida na malipo yao -na malipo kushirikiana faida Ina kuambukiza juu, ndie mukue sawa. ndie Kila mtu lazimu amalizie apitizwa vizuri kwauhaki, na Msingi bora ya matokeo yao
