ADVANTAGES OF HOLDING TIST MEETINGS.

TIST meetings are good for sharing Best Practices that are always exercised by TIST Farmers.

2. A way of mobilization for Small Groups and empowers leadership skills.

3. It creates awareness of TIST activities to the community.

4. It motivates farmers to work actively for TIST program.

5. Meetings help in identification of challenges and resolving.

6. Meetings bring unity and development to the area.

7. Help in building peace sharing.

8. It's generally a learning center. Let's embrace meetings in our localities for development.

Alex Oile, Cluster Servant - Obule in Amuria District

TREES ARE A VERY IMPORTANT PART OF THE EARTH

They take carbon dioxide and give us oxygen; without oxygen a human being cannot live for even two minutes. They are thousands of types of trees; each country on earth has plants and trees. That is why we encourage farmers in Uganda to plant more trees. Trees keep the environment cool. They also clean the air by taking harmful gases. The cotton given by trees is used to make clothes which human beings wear. They give us wood, which is used for making books, windows, and for burning. Trees give us fruits like apples, mangoes, bananas, and oranges, but many trees are used to make medicines that keep us away from diseases. Forests are home to thousands of animals like lions, tigers, deer, monkey, and mountain gorillas. We cannot live without trees; hence we should always protect trees and plant as many trees as possible.

Twesigye Moses-Cluster Servant Mafuga

PEST MANAGEMENT

TIST farmers have been disturbed by pests and diseases that in most cases have affected trees and other crops, hence low productivity, and low income.

However, this is good news that through the following practices pests and diseases can be controlled.

1. Planting in fertile soil, fertile soil rich in nutrients, gives the best crops that are resistant to pests and diseases.

2. Crop rotation, this controls pests in way that some pests are certain to specific crop species and shifting such crops those pests fail to get survival, hence dying.

3. Mulching and cover crops, this keeps the soil fertile and with moisture enabling crops to grow stronger, hence resistant to pests.

4. Planting resistant seed varieties, where possible. Remember that indigenous seeds may be the most resistant of all, in the same case.

5. Inter cropping, the diversity of plant life in plants can help to prevent the type of pests that are dominant in certain crops and even other pests can get confused due to a variety of crops.

In conclusion, TIST members are called upon to be active with these practices to achieve big results.

By Judith Tukwasibwe-Kanungu -Ishaya Cluster

OUR EXPERIENCE WITH TIST PROGRAM UGANDA

I We are privileged to have this chance of sharing with you our experience with TIST program in Uganda. We are very grateful to TIST for the wonderful developments done in our gardens through TIST trainings. We have harvested more through Conservation Farming and the payments we have been getting annually have helped our families. We can look after the trees and increase the number of trees. We have improved our community by encouraging other members to plant trees.

Trainings and workshops that we have received from TIST have empowered us as leaders and through rotational leadership, our leadership skills have improved.

We are very grateful for the new 2021 Profit Share vouchers we have received. This has been a motivation to leave our trees alive. We appreciate our Ugandan staffs who have honestly served us, and we have been able to get all our payments.

Long live TIST UGANDA. From Rubaya groups 2012UG22

OBURUNGI BWOKUGIRA ENKIIKO OMU TISTS.

1. Enkiino ezi ninungi ahabwokwegamu emikorere mirungi kwababa emba ba TIST.

FAIDA ZA KUFANYA MKUTANO ZA TIST

1. Mkutano ya TIST hii ni nzuri kwa kushirikiana Mazoezi Bora -yenye kila wakati ime fanyika Mazoezi na wamkulima wa TIST.

2. Njia ya uhamasishaji kwa kundi ndogo na ku-wawezesha kuusu ujuzi ya uongozi.

3. Ina tujengea ufahamu wa mashughuli Kwa ma-jamii.

4. Ina wa hamasisha wamkulima,kufanyia kazi ya mpango ya TIST kwa kikamilifu.

5. Mkutano hii ina saidia kwa kutambulisha,ma changamoto na utatuzi(kutatua).

6. Mkutano hii ina letaa umoja na maendeleo kwa eneo.

7. Ina saidia kujenga amani ya kushirikiana .

8. Hii Kwa ujumla nii kituo cha kujifunzwa.

Basi sasa tukubaliane na mkutano hii Kwa maeneo yetu kwajili ya maendeleo

Na. Alex Oile, mtumishi wa nguzo ya Obule-wilaya ya -Amuria..

MTII NII SEHEMU MUHIMU SANA KWA NCHI

Zina chukua hewa mbaya na kutupea sisi okisi-jeni (hewa nzuri),bila hewa nzuri (okisijeni)wa Binadamu hawawezi hata kwa dakika mbili. Kuu-nayo mahelefu miingi ya Aina ya mtii, kila tayifa Kwa nchi inao vimea na Mtii zao. Kwa hivyo ndie tuna hamasisha wa mkulima kwa Uganda kupanda Mtii miingi. Mtii Zina Linda na kuweka mazingira kua kama ni Baaridi. Pia Zina safisha hewa na kuchukua gesi ya madhara. Na pamba yenye ina tupewa kutoka kwa mtii,ina tumikiwa Kwa kutengeneza nguo yenye wabinadamu Wana vaa. Zina tupea mbao, yenye ina tumiki-wa Kwa kutengeneza,vitabu,madirisha na Kwa

kuugua(kuuchoma). Mtii pia ina tupea matunda sasa:-apples,maembe,ndizi,na machungwa, lakini Mtii wengi,ina tumikiwa Kwa fanya dawa yenye ina tulinda sisi kua mbali kwa magonjwa. Msitu nii nyumbani kwa wanyama mahelefu sasa:-simba,chui,kulungu,tumbiri na sokwe wa mlima. Hatu wezi kuishi bila mtii,hivyo lazima daima tulinde Mtii yetu na kupanda pia mtii kwa wingii vile tunaweza kwa haraka.

Na.Twesigye Moses -mtumishi wa nguzo ya Mafuga.

USIMAMIZI WA WADUDU

Wa mkulima wa TIST wa mekuawakisumbuliwa na wadudu na magonjwa yenye zaidi sasa ime wathirisha Mtii na vimea nyingine,kwa hivyo ime waletea uzalishaji yao kurudi chini na mapato yao pia ikirudi chini.

Lakini sasa,hii ni habari nzuri,sasa kupitia Kwa Mazoezi ya fatayo, wadudu na magonjwa itawezwa kudhibitiwa.

1. Kupanda kwa udongo ya Rutuba, udongo ya Rutuba yenye tajiri kwa madini,ina tupea kilimo Bora yenye ina upinzani kwa wadudu na magonjwa.

2. Mzunguko wa kilimo,hii ina kubhititi wadudu kwajili ya wadudu zingine niza Baadhi ya Aina ya kilimo maalumu na kuhamisha kilimo sasa hio, wadudu hio inashindwa kupata maisha, Kwa hivyo ina kufaa tu.

3. Matandazo na kilimo kya kufunika, hii ina linda Rutuba ya udongo na kukua na unyevu ya kuwezesha kilimo kukomea kama ni yanguvu, hivyo itakua sugu kwa wadudu.

4. Kupanda Aina ya mbegu sugu,ambae Ina wezekanao,Kumbuka ya kwamba mbegu za Asili,Zina wekwa za sugu zaidi kushinda zingine, katika uchanguzi sawa.

5. Kuchanganya vilimo,utofauti wa maisha ya vimea Kwa vimea ina weza kusaidia kwa kuuzuia ma Aina ya wadudu yenye kubwa ndani ya vilimo zingine na wadudu zinaweza kuchanganyikiwa,kutokana kwa Aina ya vilimo mbalimbali.

Hitimisho, Wanachama wa TIST wa mehiitwa kukua makini na Mazoezi hiizi ndie wafikie kwa matokeo kubwa

Na.Judith Tukwasibwe-wilaya kanungu-nguzi ya -Ishaya

UZOEFU WETU NA MPANGO YA TIST UGANDA

NSisi tunye pendelea kukua na nafasi hii,ya kushirikiana na wewe uzoefu yetu na mpango ya TIST ndani ya Uganda. Tume kushukuru sana Kwa TIST kwajili ya maendeleo ya ajabu, yenye imefanyika kwa ma Bustani yetu kupitia Kwa Mafunzo ya TIST. Tume vuuna sana zaidi kupitia Kwa ulimaji wa uhifadhi na pia malipo yenye tuko tunapokea kila mwaka,imetusaidia sisi Kwa familia zetu . Sisi sasa tuna weza kuangalia Mtii zetu na kuongea idaadi ya mtii zingine. Sisi tume boresha jamii yetu na kuaweka moyo Wanachama wengine kuusu kupanda mtii kwawingi .

Mafunzo na warshazi zenye tuna pokea kutoka kwa TIST zime tuwezesha sisi kama wa viongonzi na kupitia Kwa mzunguko wa uongozi,ujuzi wetu wa uongozi,ime boreshwa.

Sisi tume kushukuru kwajili ya faida mpya ya 2021,ya shirika ya vocha, yenye tume shaa pokea. Hii imekua uwahamasishaji Bora yenye ime pea mtii zetu kuishi. Sisi tuna shukukuru na kufahamu wa fanyakazi wetu wa Uganda wenye kwa uaminifu wa kutumika,na tumeweza tupokea malipo yetu yote.

Muishi Maisha mareefu -TIST UGANDA Kutoka kwa vikundi vya Rubaya 2012UG22.
